Architect new SQL environments; provisioning compute resources, drive layouts and set up replication across two data centers. Implement system monitoring tools to minimize downtime. Provide primary support for troubleshooting email archiving for legal/compliance department on all EDiscoveries. As Commvault Simpana email archive expert, establish backups, retention policies and quarterly restore testing. Contribute technical expertise to develop and document integration plan for new company acquisitions; integrate SQL environments and disparate systems for cohesive environment. Collaborate with PMO on IT documentation for database servers and applications to finalize acquisition. Partner with plant management to define business workflow and evaluate system needs. Drive team execution plan. Setup database availability groups across data centers to maximize uptime. Serve as trusted advisor and technical expert for software and tool selection/purchase. Research and obtain quotes from hardware/software vendors, recommend appropriate vendor. Negotiate contracts, coordinate implementations with provider. Track budgets using Capex and Opex, identify opportunities for cost-savings, provide executive reporting. Prepare root cause analysis reports on downtime issues and provide remediation resolution report to executives. Track company/SQL licenses and usage information, uncover cost-saving opportunities through core reduction and SQL environment consolidation. Support 12 Exchange servers ensure health of all systems and assist with patch management. Perform MYSQL backups, restores, general administration. Complete copy backs on 8 TB SQL database, provide to

QA for testing and development. Key Initiatives/Accomplishments ? Rolled out mobile device management administration and configured Intune. Secured all company owned IOS and Android devices to remotely reset and enforce application compliance. ? Championed effort to automate tasks within PowerShell, which improved efficiency and saved labor hours. ? Successfully executed large project to upgrade all company SQL servers to SQL 2012 and 2014 and the use of "Always On" functionality for SAP systems. ? Implemented anti-spam solution to guarantee secured Exchange environment. ? Spearheaded Active Directory (AD) domain migration, consolidated multiple domains into one. Increased administration efficiency which provided significant cost-savings. ? Launched company-wide email archiving tool, comprised of 50TB. Established policies, training and documentation. Adjunct Professor National American University 2005 to 2011 Taught courses on hardware/software configuration, introduction to CIS, SQL Server administration and programming, databases, systems analysis/design, integrative systems, and project management. Mentored students on Information Technology career path. Key

Initiatives/Accomplishments ? Consistently achieved student evaluation score of 4.5 out of 5.

Technical Skills Microsoft Windows Server 2000/3/8/12, Window 7, 10. SQL Server 2008, 2008R2, 2012, 2014, 2016. SharePoint 2010 and 2013, Microsoft Exchange 2010, 2013, Intune Mobile Device Management, Office 365 Proofpoint Email Gateway and Targeted Attack Protection, Citrix 6.0, Active Directory, Commvault, Simpana, ALWAYS ON, SQL Mirroring, SQL Log Shipping, SQL Transactional Replication. Senior SQL Database Administrator Conesco Finance 1999 to 2010 Installed, supported, administered 500+ 2000, 2005, 2008, 2008 R2 SQL Databases and Analysis Services for 2000 users on virtual environments. Collaborated with report and application developers to verify following proper coding standards for SQL. Assisted with code development for applications. Coordinated with business units; ensured Service Level Agreements (SLA's) adhered to customer needs. Tuned, optimized and re-indexed tables in various databases. Monitored all servers for performance issues and provided problem resolution. Analyzed, forecasted and made recommendations to accommodate future database growth. Documented and installed upgrades and hotfixes in SQL Server. Monitored and administered Oracle Servers and databases through

Grid Control. Implemented database mirroring and log shipping to ensure high-availability and recovery nationwide. Prepared SAS70 documentation for IT Department audits to ensure adherence to all requirements. Documented processes to ensure continuity across database team.

Key Initiatives/Accomplishments

- ? Led multiple projects across large data sets; created data warehouse as centralized reporting repository.
- ? Set up standards for securing data, recommended best practices for pushing code from development and test to production through more efficient change control process.
- ? Spearheaded consolidation and upgrade from SQL 2000/2005 to SQL 2008. Migrated multiple Microsoft Access databases to SQL. Upgraded SQL Server Reporting Services from 2005 to 2008, with minimal downtime. Set up security best practices and backup policies using Commvault.

Teaching Experience

Education Master's Degree in Information Security and Management Colorado Technical University - Denver, CO Bachelor's Degree in Computer Information Security Colorado Technical University - Denver, CO Associate Degree in PC Desktop Support National American University - Rapid City, SD

Skills Database, Sql, Erp, Software integration, Sap, Documentation, Contract negotiation, Forecasting, Budgets, Training, Merger & acquisition, Merger & acquisition integration, Asset management, Vendor management, Process improvement, Integration, Sme, Staff training, Azure, Solution Architect, Customer Service, Strategic Planning, Vmware, Exchange
