

Front End Web Developer Front End Web Developer Front- End Web Developer Boulder, CO I am a front- end web developer who specializes in using modern web languages and tools to build beautiful and user-friendly websites and web applications. I strive to utilize technology's boundless potential to spread information and change the world. My services: ? Custom Website Solutions ? Redesigns, Updates, and Fixes ? React Development ? JavaScript Programming ? Design to Code ? Advanced CSS/SASS ? WordPress Website Development ? WordPress Block Development ? CMS Development ? API Integration ? Serverless Architecture Although I have experience across the full-stack, my expertise is front- end development. I love building clean and elegant UIs that work for users. I deliver websites that are both polished and robust. I'm experienced in working closely with clients, coding based on specifications, and building software collaboratively. I am a self-motivated learner that loves to conquer technical challenges and solve problems creatively using code. I'm always looking to expand my horizons to new tools, languages, and platforms. I am currently seeking full-time opportunities, contract jobs, and new clients to work with. Let's chat!
