

Technical Development and Training Lead Technical Development and Training Lead Nashville, TN

Work Experience Technical Development and Training Lead Bridge Connector May 2019 to Present

Assumed additional responsibility over technical training as well, while keeping previous responsibilities as technical lead of core platform team. Own training and onboarding from a technical perspective. Lead effort to build new UI v2 with new in-house framework Built technical documentation for internal technology stack Lead a Bi-weekly meeting explaining product to all new hires (all departments) Lead security training education and other training programs for engineer improvement. Full Stack Engineer (acting Frontend Lead) First developer hired in Nashville headquarters, where I went from refactoring code to assuming the responsibility of acting Frontend Lead. Lead a small team, mentored engineers, and interviewed new engineering candidates. Was the main contributor, writing majority of code for first version of our core products, SPA for building workflows. Product was used internally and in large part as a proof-of-concept which helped to raise additional funding. Bridge raised some \$20 Million, and tripled personnel in about a year. Served as the primary point of contact for all frontend UI issues. Mentored team members on technical concepts (Vue, Vuex, Unit Testing via Jest) Built original implementation of Workflows (UI for core product offering) Full stack engineer (acting frontend lead) Bridge Connector June 2018 to Present First developer hired in Nashville headquarters, where I went from refactoring code to assuming the responsibility of acting Frontend Lead. Lead a small team, mentored engineers, and interviewed new engineering candidates. Was the main contributor, writing majority of code for first version of our core products, SPA for building workflows. Product was used internally and in large part as a proof-of-concept which helped to raise additional funding. Bridge raised some \$20 Million, and tripled personnel in about a year. Served as the primary point of contact for all frontend UI issues. Mentored team members on technical concepts (Vue, Vuex, Unit Testing via Jest) Built original implementation of Workflows (UI for core product offering) Software Architect XO Technologies January 2018 to June 2018 Full Stack Engineer by industry standards) working on the XO Vision Platform used by the field service industry to help field service technicians to more easily perform their job, by providing real-time content capture to customers, workflows, and

on-site information, telepresence, OCR & Transcription of content captured. Serving several large customers. (i.e. BP & Lee Company) Built new features and maintained SPA, (frontend & backend) ?
