Sdlc, B2b, Pos Additional Information EXPERTISE During my career journey have gained exclusive expertise in several areas such as follows:

IT Management: Strong skills of IT Management that led to IT Team according to ITIL standards. I have managed IT projects via following Agile and Waterfall methodology and approaches. Played a significant role in developing and implementing IT policy under the supervision of my best practices for the organization. Conducted regular system audits to secure organization data and standards - the project plans, design, risk management, deliverables, budget controls, and resource allocation. at last, KPIs evaluated my team's success

ERP Implementation & Re-Engineering (E2E): A crucial role in ERP Implementation & customization, managed core phases such as Business Requirements, Project Plans, Fit/Gap Analysis, Architect & Customization, trainings, CRP sessions, Starring Committee Updates, Change Management. Architected the business processes, and business cases to adopt worldwide best practices.

Software Application Development (E2E, B2B): Concreate exclusive experience in Software Engineering and Development. Designed an influential framework to organize technical codes for a team to follow programming standards as well as developed several custom build software applications. Hands- On experience with documentation to follow ISO, ITIL, and SDLC standards.

Data Administration: Highly experience in Database Administration and Data Security. I have been securing an organization's data using different techniques such as Data Modeling, Backups, Disaster Recovery, Data Purging, ad-hoc reports, and data-warehousing.

System Integration (B2B/B2C): Competency in synchronization and integration of data between different systems. I also have integrated (B2C) IBM Point of Sales (POS) system with corporate application, integrated bank system (B2B) with financial system, as well as integrated different hospitals with an appointment booking system.

Corporate Businesses: Worked closely with Finance, HR, Retail, Airlines and Hospitals and gained a priceless experience. involvement in re-engineering processes in financial transactions (month closing, reconciliation, GL Ledger, Balance Sheet, Controls Accounts) I have also worked with HR to automate Time Attendance Systems, Payroll, Performance KPI Review.

IT Audit: I have been arranging company IT Audits to give assurance that the IT systems are adequately protected according to standards, provide reliable information to

users, and properly managed to achieve their intended benefits. Played my significant role to qualify Panda Retail Company for ISO Certificate.
