

Associate Technical Lead Associate Technical Lead San Diego, CA Work Experience Associate Technical Lead Magnet360, The Mindtree Salesforce Practice - San Diego, CA October 2016 to Present

- constantly striving to meld industry-standard front end practice and tools like the Salesforce Lightning SLDS, Highcharts, GIT/ version control and automation with the Salesforce CRM aspect of the business, to present large amounts of data to users in an accessible way
- Customize Salesforce Visual Force pages, and Lightning components/communities for a fully custom look/feel/functionality
- collaborate heavily with multiple vendors, developers both on and offshore, constantly work to solve the issues that arise from integrating Salesforce with cutting edge front end and database technologies
- assist in architecting solutions to front end challenges unique to a hybrid Salesforce environment
- help manage a large front end workload for our largest ongoing client Ecolab
- work in a fully Agile environment including retrospectives and backlog grooming to manage the large number of JIRA & DevOps stories assigned for each 2 week sprint and giving customer/stakeholder demos after each sprint
- work 100% offsite utilizing Slack, email, Goto Meeting and other tools to stay present and productive
- maintain best practices in mobile-first development, use of tools like Bootstrap and Foundations, perform HTML/CSS/JavaScript code reviews as well as some input on JSON data modeling and back end/front end integration
- working toward a long-term goal of full stack development in the Salesforce environment

Freelance Front- End Developer Macmillan Science and Education April 2016 to June 2016

- revamp and update of macmillanhighered.com
- refactor the student table of contents section from standard HTML into ReactJS
- style and help augment ReactJS components
- apply all necessary protocol to meet AA accessibility standards

EJI

- work in a fully Agile environment using JIRA and Confluence to create and track stories/sprints
- Help to ensure AA web accessibility rating adhering to WCAG standards for ARIA web applications
