

Email Specialist/ Front- End Developer Email Specialist/ Front-End Developer Graphic Designer/ Front- End Developer DeLand, FL In the 17 years that I have worked as a Graphic Designer, whether creating color separations for screen printing or programming HTML and CSS for emails, there have always been 4 constant principals that have underlined me professionally. 1.

Communication - When dealing with clients, outside vendors or fellow team members, the ability to communicate effectively and clearly is an integral part of making a project run smoothly. 2.

Relationships - People s lives professionally, are always effected by their personal life. And lets be honest, we all have areas that we can work on. Having the ability to relate to the people that you deal with on a regular basis - in the office or client facing - can be the difference between having a bad day or landing the next big account. 3. Integrity - While it is easy to tell someone what they want to hear, I have found that it is more beneficial to be honest and upfront with people. Giving a client a realistic expectation on a project, is always better than being late on a deadline and disappointing them. 4. Knowledge and Growth - As my career has expanded, I have had the honor of being mentored by some extraordinary professionals that have shared their knowledge and help me to grow both professionally and personally. It is important to be able to learn new tasks and programs quickly, keeping yourself from become stagnate. I am confident that both 17 years of Graphic Design knowledge and my core principals will add value to your company, and look forward to speaking with you in the future. Authorized to work in the US for any employer Work Experience
