

Senior Process Manager Senior Process Manager Senior Process Manager - Eclerx Work
Experience Senior Process Manager Eclerx February 2018 to Present ary 2018 Python eCube
GUI: NodeJS Managed webapp to input data for Crawling and Parsing of Javascript website for
info using python (django/ ask framework) Infos Trained and guided Team of 10 developers in
python and Rabbit MQ 27 years old related frameworks and services C++ Mumbai eCube
Crawling Scripts: PHP India Made Crawler and Parser Standard Template to handle Scala di
erent site designs and to be able to easily customise individual site script Contact
visheshbangotra@gmail.com eCube Crawling System: Software Development Design and
implement system to crawl 10000 URLs per day Skills 9819373623 using RabbitMQ for Queuing
and python requests and selenium Programming visheshbangotra@gmail.com to scrap data
WIP: Cracking competitor site's aggressive blocking of Crawling Algorithms Software Developer
Hill Queen Apartments - Mumbai, MAHARASHTRA, 400059, IN June 2017 to November 2017 Web
Development States Opintr Inc. June 2017 to November 2017 Django Email Engine Flask
About Me Ported sending of mails from SMTP to Sendgrid Web API and jQuery setup replies to
noreply to proper message channel in Vetted Career Goal: work at technically App Knockout
challenging places to learn, Also dockerised and made that into a microservice HTML/CSS
improvise, improve and PDF Generator contribute to the same Created a service to make PDF
reports of work ows Professional Goal: incept and Fully customisable PDFs with options to insert
templates for Databases develop large scale, high various sections and create new sections Solr
frequency technologies to help solve problems MySQL Software Developer Postgres May 2016 to
March 2017 Redis Media Migration from Local Disk to Amazon S3 MongoDB S3 upload
wrapper in PHP and used that directly upload images Python Developer to Amazon S3 rather than
write on disk and migrate using daily B.Tech IIT Roorkee cron job Languages Removed
dependency on Media Disk which was expensive and Hindi not as responsive as S3 English
Mobile App APIs Punjabi Data aggregator layer to gather data from various micro services and
serve to Mobile App Designed and implemented scalable API layer using ask/scala New API layer
Improved response time to 1/5th and concurrent- INTERESTS load capacity by 6x over the

previous one in Magento Education Bachelor of Technology in Operation Research and Management Indian Institute of Technology Roorkee July 2009 to May 2013 Links <http://www.doyoubuzz.com/vishesh-bangotra>
