

Oracle Application EBS Database Administrator Oracle Application EBS Database Administrator
Highlands Ranch, CO Since 2004, I worked as a contractor, in the Oracle Application Management Branch at the National Business Center (NBC), in Denver, CO. As a Federal Employee, I worked in the Oracle Application Management Branch since 2007 for the Interior Business Center (IBC), in Denver, CO, as a Federal Oracle Application Database Administrator. I am very familiar with the EBS stand alone as well as shared multi-node environment and have hands on experience with daily operational support, maintenance, administration and availability of the R12.2 OFF environment. I can work independently with minimal supervision or within a team environment. I am well-versed and very knowledgeable with the setup, implementation and maintenance of Oracle E-Business Suite and have prior experience with migrating several agencies onto the Shared environment. I have over 20 years of Technical experience in Relational Database Management Systems, Client/Server Application management, Oracle Applications Technology Foundation for ERP Applications. Additionally, I have technical experience in Core Oracle Applications and have supported large landscapes with up to 16 instances. My expertise also includes managing Oracle application databases and administration with strong knowledge on migration and conversion of new agencies into the shared environment. I have excellent customer relationship management skills. I communicate and work closely with the interior and exterior agencies/clients and share my knowledge as needed with my peers. Technical Oracle Applications version 12.1.3 & 12.2, Database version 7.3.4 upto 12C on Unix/Linux/Solaris/HP platforms, java 1.6.0.29, SSL (Secure Socket Layer), WebLogic. Oracle E-Business Suite: PA, AP, AR, GL, PO, FA, GRC, IProcurement, HR, Self Service Web Apps, webLogic, Workflow and Discoverer. Other: Oracle Alerts, RMAN, Oracle Application Manager, Oracle Enterprise Manager, Grid Control, aoljtest, TOAD, SQL, PL/SQL, Oracle Forms and Reports, SVN, My Oracle Support (MOS) and other Oracle Diagnostic tools. Authorized to work in the US for any employer Work Experience Oracle Application EBS Database Administrator 6e Technologies January 2018 to Present Managing internal EBS instances, working with the Oracle Cloud Infrastructure for Lifting and Shifting of containerized EBS applications. Supporting the 6e development team to work with other cloud vendors. Keeping track of patching

needs and providing fresh EBS environment for API testing. Team Lead and Oracle Applications Database Administrator Interior Business Center - Applications Management Branch March 2004 to November 2017 03/2004 - 11/2017 10+ years of Federal experience as a Team Lead and Oracle Applications Database Administrator for Oracle Federal Financials. Awards received: 4 -Award of Excellence, 2-awards of Appreciation for R12 upgrade. Oracle Federal Financial Application Production DBA - Oracle Database version 12c and Oracle Financials 12.2, Platform LINUX x86 and Solaris on Unix environment.
