

Technical Project Manager Technical Project Manager Technical Project Manager - Global Portfolio Management Systems Bergenfield, NJ I am an accomplished Business Continuity Planning and Information Systems professional with over 20 years of experience. Providing visionary leadership in the management of strategic business continuity planning projects from conception through to implementation. I've worked at various international locations utilizing my acquired Business Continuity Planning and Project Management skills that include various vendor Software and Hardware Technologies. I am a Multifaceted and resourceful senior management professional with proven experience in leadership of strategic planning and oversight of global IT technology projects with successful completion for high-profile clients including TIAA CREF UPS, Tiffany & Co and Avon Products Inc. I'm a Proactive and Creative problem solver with demonstrated success in leadership of complex projects that introduce strategic technology solutions and system improvements to enhance operational efficiency and align with client goals. I am a Collaborative and decisive leader with strong business acumen, excellent communication and interpersonal skills that I use to build a rapport with key stakeholders to resolve issues, manage full cycle projects in fast-paced, high-pressure environments requiring adaptability and decisiveness to ensure service excellence.

Core Competencies Hey Global Technical Project and Infrastructure Management for the Systems i platform ? Strategic Planning ? Full-Software Development Life Cycle (SDLC) ? System & Application Analysis Logistic requirements for Data Center Rebuilds Network Planning and implementation Business Continuity Planning and Implementation ERM/CRM Environments ? Proficient With MS Office Products ? Maintained Mid-Range Compliance Rules/Regulations Risk Assessment & Mitigation ? Large-Scale IT Solutions ? Systems Administration ? Test & Troubleshooting Disaster Recovery Planning and Maintenance ? iSeries IT Security Administration and Support ? Vendor Management ? Process Improvements Staff Supervision/Training/Performance Management ? Creative Problem Solving ? Meeting with Stake Holders Cyber Security (Core/Switch/Data Breach/Critical infrastructure) Work Experience Technical Project Manager Global Portfolio Management Systems February 2017 to Present Risk Assessments Performed assessments of introducing the iSeries to supply chain technologies.

Investigating compliance implications with using supply chain technologies Create Business Continuity Planning RFP/SOW for perspective and existing clients Disaster Recovery Risk Assessments Technology Requirements iSeries sizing CPU/Memory/DASD utilization for various customers Sr. iSeries infrastructure /Operation Manager Perfumania Holding - Bellport, NY October 2016 to February 2017 , troubleshooting of issues and Providing 24 hour Level 2 technical support for the platform. Spearheaded the analysis for the Infrastructure requirements to upgrade the iSeries from Model 820 iSeries Power 9 Managed the Communication performance that included but not limited to network planning, systems development and architecture; upgraded the Midrange network connectivity The maintenance of the iSeries environment (supporting JDE/JDA) iSeries Project Manager/infrastructure Project Manager TIA-CREF - New York, NY October 2010 to January 2016 Risk Assessments Performed Risk Assessments for iSeries . Assessments were completed in tandem with other IT team leaders that met all of compliance requirement s this included Cyber Security implementations as was; for all new applications, existing applications and for all Hardware and Software installations and upgrades. Security Responsibility Verified that all infrastructure compliance regulations were meet both within and external to the iSeries Assisted in all iSeries SOX audits (both internal and external) Worked with other security teams to insure internal data protection is always met. Continue to verify Security validity throughout project lifespan Business Continuity Coordinator Provide Business Continuity planning consulting services using the DRI International best practices model and by evaluating the current Business Continuity Plan, Information Technology Infrastructure and Disaster Recovery Center logistics Developed and executed a BIA to support business continuity strategies for an effective mitigation of threats Implement the Automated Call Notification system using Help Systems Robot monitoring tool Identify the appropriate Business Recovery Center based on employee geographical dispersion and implemented the solution by negotiating the contract and managing the infrastructure and business requirements Coordinated the yearly BCP Test Schedules from 2008-12016 Tested the BCP Infrastructure and Recovery Center switching from production to Disaster Recovery mode Project Manager/infrastructure PM/Senior application analyst Synergistic IT for TIAA CREF Infrastructure

Project manager / Senior Technical Applications Analyst October - New York, NY October 2007 to January 2010 Risk Assessments Performed Risk Assessments for iSeries applications. Assessments were completed in tandem with other IT team leaders that met all of compliance requirements this included Cyber Security implementations as was; for all new applications, existing applications and for all Hardware and Software installations and upgrades.
