

Software Developer Software Developer Java developer Milpitas, CA 8 years experience in software engineering, Involved in all phases of software development life cycle. 3 years experience in Java web development, 1 year s experience in big data, excellent learning ability. Work Experience Software Developer Capstone Project September 2013 to December 2013 - Designed Software for FallArm with Spring, Hibernate, Servlet, JSP, MySQL and Android Studio. I involved in web design, logic tier and database tier implementation, JUnit test and document writing. It could detect falling of patients 100 percent and automatically send warning email and SMS to doctor. Software Developer NSEsoftware, LLC May 2013 to August 2013 - Maintained and improved Panorama. I established command model of Panorama and using MFC and PHP to support Panorama automatically handling users requirement in cloud server. Software Developer ROHM Semiconductor (China) Co., Ltd - ??? July 2003 to April 2012 - Led team to build client-server ERP - Production Management System in Windows platform using Vb.Net, SQL Server and Crystal Report. Utilized SSIS (ETL tool) to load mass data. More than 200 clients operated this system simultaneously. Its processing speed and storage capacity multiplied up 10 times. - Developed Paperless office system which used Spring, Hibernate and Tomcat to build a typical three tiers web application. Implemented Spring MVC by JSP, Servlet, JavaScript, HTML, MySQL. I was responsible for back-end program including logic tier and database tier. It substituted traditional office system based on paper and reduced cost of paper more than \$8,000 per year. Education Master of Computer Science in Design Northwestern Polytechnic University 2012 to 2013 Bachelor of Computer Science in Software Engineering Tianjin University Of Technology 1999 to 2003
