

ORACLE DATABASE ADMINISTRATOR ORACLE DATABASE ADMINISTRATOR ORACLE DATABASE ADMINISTRATOR - Arkansas Blue Cross Blue Shield Apt, AR Over 7+ years of IT Experience as an oracle database administrator, participating in System Analysis, Designing, Testing Development & Support of Oracle 9i, 10g, 11g and 12c in Production, Staging, and Development environments Prepared documentation of projects for Functional Requirement Spec (FRS), Use case Spec, ER-Diagram, test plan, test scripts and test Cases. Have worked in fast paced AGILE environment & attended daily scrum meeting. Highly motivated, excellent team player, enthusiastic, strong interpersonal and communication skills in dealing with customers. Result-driven, reliable, resourceful, professional Oracle Database Administrator with experience in designing, implementing and maintaining Oracle 10g, 11g and 12c RDBMS. I Provide support to next-generation database solutions in Oracle at the Enterprise level. I also work across Red Hat Linux, Windows platform in development and test environment with responsibilities of Troubleshooting, Performance Monitoring & Tuning, Data Load & Migration, RMAN Backup and disaster recovery. My DBA skills include: Oracle 10g/11g and 12C Database Administration Oracle 12c installation and configuration Enterprise Manager/ Grid Control Administration Extensive use of TOAD and SQLdeveloper. Data Integrity & Security Upgrading File Systems To ASM Using REDEFINE Upgrade & Patch Application Data Load & Migration Performance Tuning & Capacity Monitoring Backup & Recovery(RMAN) Data Guard Administration Automatic storage management Production to Test Refresh Table partitioning Managing reload tools like SQDATA and CDC Real Application Cluster Administration (RAC) Work Experience ORACLE DATABASE ADMINISTRATOR Arkansas Blue Cross Blue Shield - Little Rock, AR December 2016 to Present Duties Role & Responsibilities: Provide 24x7 Production database support in Applications Development areas regarding database program design, implementation and performance. Extensive use of Oracle Enterprise Manager (OEM) for Monitoring Sqls, Generating SQLs Explain plans, Generate AWR, ADDM and ASH reports, Generating Information Publisher Reports, Oracle database online patching etc. Daily monitoring of databases validating Veritas NetBackups to make sure they complete with no errors. Collaborate with DBA team to ensure

timely data reloads to the ODS using the SQDATA capture agent. Monitor production databases for space utilization and the need for design change or reorganization. Participate in reviews to evaluate database performance and recommend solutions to ensure the effectiveness of scheme, tables, procedures and permissions. Tested database performance issues (monitoring and tuning) to ensure database optimization. Define and allocate space for all test databases. Participate in reviews to evaluate database performance and recommend solutions to ensure the effectiveness of scheme, tables, procedures and permissions. Implemente Oracle database backup & recovery solutions using RMAN as well as conventional backup methods EXPDP and IMPDP. Assist the Database Administration Supervisor with configuration management and database control programming. Partitioned large tables to improve Performance. Provide status reports to the Database Administration Supervisor for all active and scheduled projects. Create user accounts, roles and grant required access permissions and privileges to users based on the applications they are accessing. Monitor standards and procedures to ensure recoverability and availability of production databases. Participate in disaster recovery testing efforts. Assist Lead DBA in the maintenance of the assigned DBMS-based application system and the associated security procedures. Develope UNIX shell scripts and SQL scripts to carry out routine checks on databases. Performed point-in-time recovery. Responsible for migration of databases. Performe major Amisys Release upgrades. Installed and configured ASM (Oracle 12c Grid Control) on HPUX. Support Application developers in database programming and design. Develop personal training objectives for obtaining further knowledge of the assigned database by evaluating and recommending new database technologies. Refreshed Test and Stage environments from Production using IMP/EXP DP Education Associates Degree In Computer Systems and Network Administration in Computer Systems and Network Administration Richland Community College Dallas TX Associate in law University of Yaounde Cameroon - Yaounde, CM Skills Amisys (2 years), Database (2 years), Oem (2 years), Oracle (2 years), Rman (2 years) Additional Information TECHNICAL SKILLS RDBMS: Oracle database 11gR2/10g and 12c LANGUAGES: Oracle SQL, Linux Shell Scripting OPERATING SYSTEMS: Red Hat Linux RHEL

5.x, UBUNTU, SOLARIS, Windows 2000-2012 R2 and HPUX. SOFTWARE/
APPLICATIONS/TOOLS: SQL*PLUS, DBCA, DBUA Netca, Net Manager, Recovery Manager
(RMAN), Data Pump (expdp, impdp), SQL*Loader, Oracle Enterprise Manager (OEM), Grid Control,
TOAD AND SQLdeveloper, Reflexion X, and DBFORGE. TUNING TOOLS: SQL TRACE, AWR,
and ADDM and TK Prof WEB TOOLS: HTML, XML, java. CONTENT MNAGEMENT TOOLS:
Contentful, JIRA. AGILE: VersionOne. CDC and SQDATA AMISYS
