Prepared Test summary report after every build Release and submit it to the QA Managers. ? Participated in QA team meetings and walkthroughs for weekly QA testing review. ? Created PDF reports using Golang and XML documents to send it to all customers at the end of month. ? Developing Python Framework using Django to perform scan software unit monitoring. ? Designed the front end of the application using Python. ? Design and development of user interfaces and client displays using Java Script, JSP, CSS and troubleshoot various issues in Python code and fix them with code enhancements- code used various python libraries such as PyJamas and Jython. ? Built various graphs for business decision making using Python Matplotlib library. ? Developed and tested many features for dashboard using Python, Bootstrap, CSS, and JavaScript. ? Development of Spring Microservices in PREDIX cloud environment. Converting user stories into backend logic in service classes. ? Developed automated scripts using Selenium Web Driver and Implemented Frame work using Java. ? Automation infrastructure and error free test scripts are developed using Selenium Web driver methods and features. ? Worked with optimization of server resources, Amazon Elastic Cloud instances and website security, Web services /REST, Amazon AWS, Chef and Puppet. ? Deployed the application on cloud using AWS.

? Used Chef for server provisioning and automating infrastructure. ? Development and version control of Chef Cookbooks, testing of Cookbooks using Food critic and Test Kitchen and running recipes on nodes managed by on premise Chef Server. ? Used Amazon Cloud EC2 along with Amazon SQS to upload and retrieve project history. ? Created instances in AWS as well as worked on migration to AWS from data Center. Worked on developing internal testing tools which were written in Python. ? Developed the front-end featuring web interface using HTML5, CSS3, JavaScript and used JQuery framework for UI centric AJAX behavior. ? Developed server side application and server side validations using Django framework. ? Performed validations for input fields making use of mainly Active Records. ? Implemented MVC architecture in developing the web application with the help of Django framework. ? Associated with working cloud computing platforms like Open stack. ? Built various graphs for business decision making using Python Matplotlib library. ? Fetched twitter feeds for certain important keyword using python-twitter library ? Extensively worked on analysis and design of application. ? Implemented business logic using Python/Django. ? Responsible for setting up Python REST API framework using Django. ? Implemented code in python to retrieve and manipulate data. Environment: Python 3.x, Django 1.4, Microservices, MySQL, Linux, HTML, XHTML, CSS, AJAX, JavaScript, Perl, Apache Web Server, Git, Linux, Selenium, Chef Python Developer MetLife - Raleigh, NC September 2014 to August 2015 Roles & Responsibilities: ? Actively involved in developing the methods for Create, Read, Update and Delete (CRUD) in Active Record. ? Involved in designing application system requirements and coded back-end and front-end in Python. ? Worked on cross-browser and cross-platform development of HTML and CSS based websites in Windows like IE 6, IE 7, IE 8 and FF. ? Participated in providing change requests, trouble reports and requirements collection with the client. ? Implemented and modified various SQL queries and Functions, Cursors and Triggers as per the client requirements. ? Managed code versioning with BitBucket and deployment to staging and production servers. ? Implemented task object to interface with data feed framework and invoke database message service setup and update functionality. ? Worked under UNIX environment in development of application using Python and familiar with all of its commands. ?

Developed remote integration with third party platforms by using RESTful web services. ?

Development effort for the Micro services required for the projects ? New library development with micro services architecture using Rest APIs ? Used regular expressions in order to match the pattern with the existing one and store them in database on a chronological basis. ? Improved code reuse and performance by making effective use of various design patterns and refactoring code base. ? Involved in analysis and design of the application features. ? Was involved in debugging and troubleshooting programming related issues. ? Worked in MySQL database on simple queries and writing Stored Procedures for normalization and de-normalization. ? Deployment of the web application using the Ubuntu server. Environment: Python 2.7, HTML5, CSS, XML, MySQL, JavaScript, JQuery, CSS Bootstrap, RESTful, MS SQL Server, Ubuntu server, Microservices, Windows 12 Server, Amazon S3, Jenkins, My SQL, Mongo DB, GitHub, Bit Bucket, Linux, and Windows Python Developer Matter Port - Mountain View, CA August 2012 to June 2014 Roles & Responsibilities: ? Worked with offshore teams and internal clients to Design and analyze the req of in-house applications. ? Extensively used third-party packages, such as Fabric, Django based CMS - Mezzanine and Django-widgy ? Developed frontend and backend modules using Python on Django Web Framework. ? Designed and developed data management system using MySQL and Django. ? Developed a Front-End GUI as stand-alone Python application. ? Used SOAP and RESTful API for information extraction ? Worked with Marketing and Sales teams to enhance applications to suit their needs ? Debug application deployments on multiple environments. ? Trained and documented initial deployment and Supported product stabilization/debug at the deployment site. ? Used JIRA for Bug tracking and issue tracking. ?
