

Senior Consultant Senior Consultant Senior Consultant - XCESS CORP ? Over 5 years of professional experience in Database Administration, Development of MS SQL Server 2012/2008R2 in Production and Development environments. ? Experience working as a SQL Administrator and with installation, Configuring, Deploying, Troubleshooting, Administration and Maintenance of IIS 7.0/7.5/8.0. ? Monitoring Jobs, Alerts and scheduling SSIS Packages using SQL server Agent. ? Expertise in Managing SQL Always - on environment, High Availability cluster environment (up to 8 nodes) and troubleshooting the availability Groups and other issues. ? Experience in Developing and Tuning T-SQL, database Queries, Stored Procedures, UDF'S, triggers, cursors, views, and Indexed views. ? Good knowledge in SQL Server 2008/2012 new concepts like backup compression, Data compression and using new data types. ? Extensive usage of Power Shell scripts for patching and upgrades. ? Experience on installing and configuring SSL certificates in web servers and enabled secured (https) transactions. ? Experience in analyzing the IIS logs and event viewer to collect information about server events, server performance, and user activity. ? Working experience in setting up cluster environment for load balancing and high availability of Windows servers. ? Experience in creating documentation of installation and monitoring procedures, security policies, configuration changes, migration procedures and best practices for development teams. ? Have good experience in Performance Tuning, Indexing and monitoring SQL Server using Database Tuning advisor, SQL Profiler and windows Performance Monitor. ? Implemented backup policy using Full, Differential, and Transactional Log Backups. ? Migrating SQL Server databases into SQL Server 2008 and SQL Server 2008R and 2012 by In-place upgrade process and as well as side-by-side upgrade process. ? Expertise in Data/Table partitioning, online Indexing, rebuild/reorg indexes and Update statistics at regular intervals for better performance. ? Expertise in using DBCC trace flags, handling blocking and dead lock situations. ? Monitoring Jobs, Alerts and scheduling. ? Experience in using tools like Profiler, Perfmon, litespeed and SQLCMD. ? Excellent experience in configuring servers, databases and IIS and integration. ? 24/7 Production Database on Call Support Work Experience Senior Consultant XCESS CORP November 2015 to Present Independent Contractor Database Admin Microsoft Co - Sammamish, WA May 2015 to

Present Responsibilities: ? Experienced on High Availability Always-on(AG)issues. Trouble shooting the issues manually and also using Auto fixes and refresh all replica. ? Worked on day to day Backup issues in different GEO's. ? Expertise on creating CDU as per the customer's request and troubleshooting the issues upon failures. ? Trouble shooting day to day issues like sandbox creating issues, backup issues, CDU issues, reporting issues, plugin issues, mobile offline issues, portal issues. ? Provided documentation on troubleshooting technics on issues related to Backups/job scheduling/AG/disk space issues ? Authored support documentation on installing & troubleshooting Confio tool. ? Identifying deadlocks and resolving blocking issues, rebuilding/re-organizing indexes, enabling RCSI. ? Worked on creating missing indexes and have good expertise on identifying log running queries using profiler and using Confio and worked closely with DEV's to optimize the queries. ? Postmortem reports for the Major incidents caused in the Prod environment ? Communicating with client related to incident with proper channel of email updates as per severity levels. ? Troubleshooting the SQL connectivity, Always ON issues and debug the issues using the SQL tools. ? Worked on IcM incidents assigned to the CRM SRE queue and resolve them within the SLA ? Check Jarvis logs and Kusto logs for GEO level issues, SG issues ? Moving the Orgs to Scalegroups with latest version of the CRM instance's, this is performed as part of the Organization upgrade process. ? Increase the Storage Floor and the Expire date for the Orgs in the CRM instance across the GEO based on customer's request. ? Investigating the Node failures in the Failover cluster manager and analyzing the logs. ? Troubleshoot the SSRS issues where customer isn't able to render their reports from CRM ? Change the connection settings in CRM Azure subscription ? Experienced in analyzing the cluster logs and event logs, reporting logs, sql logs for investigating and troubleshooting issues. ? Created new PowerShell scripts on identifying memory dumps check, sql uptime, sql versions, SQL Agent status and executing in all GEO's. ? Hands on experience in using CRMLive commands and corresponding issues. ? Experienced in using troubleshooting tools like Confio, Jarvis, ACIS. Technical Consultant Greenbay Technologies May 2015 to November 2015 Jan'2012 - Dec'2014) Technical Skills: Operating Systems: Windows Vista/XP/2000/NT, Server 2003, Server 2008, 2008 R2 and windows 2012/2012

R2. Databases: MS SQL Server 2012 R2/2012/2008R2 Database Tools: SQL profiler, SQL Query Analyzer and SQL Server Management Studio Web Technologies IIS, HTML, XML. Microsoft Tools Octopus, Log Parser, PowerPoint, Word, Excel, Confio, Jarvis, ACIS, Kusto. Languages: T-SQL, C/C++, Visual Studio 2015 Network Topologies TCP/IP, DNS, DHCP, FTP. Database Admin Microsoft Co - Sammamish, WA June 2013 to November 2014 Responsibilities: ? Successfully installed SQL 2008 and SQL 2012 version in Preproduction and Production environment on windows server 2008/2008R2/2012/2014. ? Installing and configuring IIS 7.0, IIS7.5, IIS 8.0 server. ? Optimization and Performance tuning using SQL Profiler, Performance Monitor and SQL Server DB Tuning Advisor. Identified slow performing queries, identified missing indexes. ? Running DBCC consistency checks, and fixing data corruption in application databases ? Maintain Alerts, Notifications, Jobs, Job Steps and Schedules. Monitor connections, locks and deadlocks and performance of SQL server ? Monitored Disk Capacity, Processor Utilization and Memory usage for Production instances ? Backup and recovery of production databases and tuning them for better performance. ? Creating and managing schema objects such as Tables, Views, Indexes, SPs and Functions ? Migrated SQL server from 2008 to 2008 R2 and 2012 successfully. ? Creating databases and logins with permissions in SQL server 2008 R2/2012. ? Used DBCC commands to check physical and logical consistency of the databases and rebuild indexes, update statistics and run DB maintenance plans ? Performed Backup and recovery & Automation of Backups using maintenance plans. ? Jobs troubleshooting in production environment using INFORMatica tool. ? Build and Support deployment tools (Build installer and Octopus). ? Implemented all major and minor releases (QFE's and hot fixes) into pre-production and production environments, and rebuilt the pre-production system on par with production prior to the all major releases. ? Good experience on Cosmos releases and running ETL load jobs ? Build deployment packages and migrate code into different environments pre-production and Production. Troubleshooting of deployment packages when deployment issues arise. ? Build and Maintain Pre-Production and Production environments. ? Experienced in using Microsoft's in built tools like SQL Profiler, Windows Perfmon and DTS for Monitoring, Developing and Tuning MS SQL Server applications. ? Implemented and documented

database Backup/Recovery & Maintenance Plans. ? Created and maintained Tables, Stored Procedures, Views, Indexes, User-defined Functions, and Triggers as required. ? Enabling SQL Trace for Deadlock analysis and profiler for analysis of long running queries. ? Developed disaster recovery plans and contingency systems including evaluating and recommending appropriate backup strategies. ? Managed and created database schemas for Relational database schemas. ? Performed On call support and 24x7 escalation call handling for databases on weekends Database Administrator Schneider National - Green Bay, WI January 2012 to June 2013 Responsibilities: Installed Windows Server 2008 R2 and required applications. Installed .NET applications in IIS 7.5 web server. Configured authentication for applications deployed on IIS 7.5 web server. Configured secure communication by assigning SSLs to the application Managed and Administrated the SQL Server 2008R2/2008/05/00 production and Non-production servers. Installation of SQL Server 2008/05 on Windows Server Clustered environment. Worked on Logical, Physical data modeling and Performance Analysis. Performed backup using backup compression and Data compression in SQL Server 2008R2 on clustered environment and SQL Server 2005 security Audit. Application support for front end feeds and Resolved Application connectivity issues like connection timeouts, connection pooling issues and memory leaks. Configured authentication for applications deployed on IIS 7.5 web server. Configured secure communication by assigning SSLs to the application Experience in exporting certificates with private key in IIS using PowerShell. Applied monthly patching and upgrades to application availability including with windows security patches. Deployed management packs to monitor our site URLs, servers, DIP URLs etc Monitored WINS and DNS servers Taking backup of our applications and restore it whenever required Worked with DB and Dev guys to troubleshoot the production issues. Configured Load balancers (NLB and F5-BigIP) to provide high availability to our production and test environment. Setting up and Monitored transactional replication, Database mirroring on Production, QA and Dev servers. Experience in setting up Always-ON in mirroring in pre-prod and UAT environments. Configured data partitioning/table partitioning on huge tables containing millions of rows for better performance. Deployed database objects from

development/testing environment to production environment. Extensively worked on Profiler, Perfmon, DMVs, DMFs and DTA to tune the databases, servers and query tuning. Created, altered/modified and tuned T-SQL Stored Procedures, Complex Queries, views, tables. Reviewed stored procs developed by the developers and given recommendations for the code modifications for production. Managed Security using SQL Logins, Roles and Security Modes for various users.

Maintained SQL Script for creation of Database Objects using Visual Source Safe. Education Bachelor in Electronics and Communications Engineering JNTU - Hyderabad, Andhra Pradesh
