IT Project Manager IT Project Manager Jakarta Work Experience IT Project Manager Sonick Pemadam Api - Jakarta January 2015 to Present A fire extinguisher or Alat Pemadam Api is an active fire protection tool that is used to extinguish the fire or control small fires, often in emergency situations. Fire extinguishers are not designed for use on fires that are not controlled, for example when the fire was already burning ceiling. Generally, fire extinguishers consist of a high-pressure air tube containing a fire extinguishing agent. Education SDN Simpar 2 - Subang June 1998 to June 2005 Skills Web Design (3 years), SEO (2 years) Links https://tabungpemadamapi.com/ Publications Alat pemadam api https://tabungpemadamapi.com/ 2015-01 A fire extinguisher or Alat Pemadam Api is an active fire protection tool that is used to extinguish the fire or control small fires, often in emergency situations. Fire extinguishers are not designed for use on fires that are not controlled, for example when the fire was already burning ceiling. Generally, fire extinguishers consist of a high-pressure air tube containing a fire extinguishing agent. Additional Information Biarpun tempat kami kecil, tapi kami bisa membuat sesuatu yang besar. Meskipun kami sedikit, tapi kami bisa melakukan apa yang banyak orang lakukan, Meskipun kami dari orang kecil (miskin) tapi bisa melakukan apa yang orang punya lakukan, Kita tidak pernah tahu akan menjadi siapa esok. Kita tidak pernah tahu akan menjadi apa. Jangan pernah menghakimi orang lain jika hanya bisa bicara tanpa bukti. Setiap hinaan akan kami jadikan cermin buat kami. Hanya ingin membuktikan

sesuatu hal yang dipandang sebelah mata, mempunyai besar untuk perubahan.
