Developing stored procedures.   Conducting code review and peer review.   Fixing bugs within the time limits based on the priority.   Project8: Accounting & Finance Module Software / Tools: .NET 2.0, C#, ASP.NET 2.0, Javascript, Oracle, Visual Studio 2005, Crystal Reports XI. Team size: 10 United Health Group February 2018 to October 2018 Clients: Optum Workers Compensation USA Software / Tools: .Net 4.6, RightFax Com API, SQL Server 2008, Visual Studio 2017, Batch Jobs Duration: Feb 2018 to October 2018.   eFax application - Automated communication of authorization decisions to pharmacy by integrating RightFax third party API component by sending eFax.   Responsibilities: POC development and demonstration   Involved in application solution Assigning and estimated the work   Involved in guiding the team members   Involved in Analysis, development, designing and bug fixing. Developer United Health Group June 2014 to August 2015 The Primary care Physician is an application used by the Optum Health Delivery Team to assist patients by providing information about receiving provider care. The Primary care Physician will allow the user to perform a provider search based on the patient's necessary criteria like distance, family history, age, gender etc., which will return information about the providers who are nearby their place. This will help the patient to receive the right type of care in the right amount of time based on their situation.   Responsibilities: Understanding the User Stories   Involved Sprint planning and estimation   Involved in daily scrum calls to communicate the status and to discuss if any gaps found with onshore team   Involved in creating and testing (using soap UI) WCF Services   Involved in writing the business logic and creating the database objects   Involved in conducting unit testing and code review   Involve in providing the KT to new joiners in the Team   Involved Sprint planning and estimation   Involved in Analysis, development, designing and bug fixing. Project6: LifeLens Clients: UHG USA Software / Tools: C#, ASP.NET 4.0, WCF Services 4.0, JQuery, SQL Server 2008, Visual Studio 2010. Developer United Health Group July 2012 to December 2013 Life Lens is a Video and Image Capturing system which contains a mobile application and a web portal. Mobile application enables field nurses to capture both wound and psychiatric case of a patient along with his/ her details and submit it for the review by the reviewers. This application has Instant video and image creation option which include the ability to assign the

video to an encounter. There is also a web portal which enables the reviewers to review the cases submitted by the nurses through the mobile application. This contains a feature called reconciliation which enables the nurses to correct the information that is recorded wrongly by mistake. From this application we can view both images and videos assigned to the encounters.   Responsibilities: Understanding the Functional Specification   Involved in creating and consuming WCF Rest Services   Involved in designing the UI pages using jquery and Asp.net   Involved in writing the business logic and creating the database objects   Involved in conducting unit testing and code review   Involve in providing the KT to new joiners in the Team   Involved Sprint planning and estimation   Involved in Analysis, development, designing and bug fixing.   Project7: Sales Edge Platform (SeP). Clients: Altria USA Software / Tools: .NET 4.0, C#, ASP.NET 4.0, WCF Services 4.0, JQuery, SQL Server 2008, Visual Studio 2010. NeoMQS October 2007 to June 2010 is a comprehensive Customer Management and Billing System that offers a unified view of the subscriber with billing at its core. NeoMQS is a modular, flexible and scalable solution. It enables service providers to effectively provision, rate, accurately bill and engage in customer care for all their basic and advanced services such as, but not limited to ISP and VOIP.   Accounting module maintains all transactions information. It allows keeping track of overall accounting operations. It keeps track customer wise, currency wise, Operational Entity wise debit and credit account balance for accounting years. It involves adding and modifying accounting years and accounting periods. It includes in generating Journal Voucher incase of any wrong financial entry. It also includes pay-in-slip functionality to maintain the record of the actual pay-in-slip transaction performed in the bank. Responsibilities: Preparation and Execution of Unit Test Cases   Preparation of Low Level Design Document.   Fixing bugs within the time limits based on the priority.   Providing support to Delivery team.   Developing stored procedures.   Presenting demos to the Quality and Delivery teams.   Designed Crystal Reports related to this module Command Buttons September 2007 to November 2007 Software / Tools: .NET 2.0, C#, ASP.NET 2.0, Oracle, Visual Studio 2005, Crystal Reports XI. Team size: 1 Duration: Sep 2007 - Nov 2007   Command buttons feature has been provided with a goal to add buttons on required page. This feature allows generating the reports in

desired formats (word, PDF, Excel) from a crystal report. This feature has been provided in-order to support client specific format. For example: Different clients can have different forms of receipt printing after taking the payment.   Responsibilities: Preparation and Execution of Unit Test Cases   Preparation of Low Level Design Document.   Developing stored procedures.   Fixing bugs within the time limits based on the priority.   Providing support to Delivery team.   Presenting demos to the Quality and Delivery teams.   Designed Crystal Reports related to this module Education Master of Computer Applications in Computer Applications Indira Gandhi National Open University 2006 Bachelor of Computer Applications in Computer Applications Osmania University 2002 Education A.P St Domnics College 1999 SSC in Education A.P Krishi High school 1997 Additional Information Technical Skills: Languages: C++, C#, VB.NET Frame Work: Dot NET Framework 2.0,4.0,4.6,4.7, ASPNETCORE 2.1, WCF   Database: MS SQL 2008   Web Technologies: ASP.NET, ASP.NET MVC, WEB API, ADO.Net, ASP.NET Core Reports: Crystal reports XI Scripting: JQuery, Java script, Angular JS, Angular Configuration Management: TFS, SVN
