Front End Developer Front End Developer Web Developer Bellevue, WA Full Stack Web Developer with a background in Front End Development and UX/UI design. Experienced in web development with good exposure to all phases of SDLC. Strong understanding of Object-Oriented Programming concepts and writing complex Database queries using SQL Server. Authorized to work in the US for any employer Work Experience Front End Developer Freelance - Seattle, WA July 2016 to Present Hand-coding of HTML, CSS, and JavaScript for web and mobile application   Implementation of jQuery and other JavaScript Libraries   Image and content production for a large group of clients. Extensive use of the Adobe Creative Suite for design.   Managing multiple projects and client schedules at once   Projects: https://2sdesignstudio.azurewebsites.net/ https://flatty-icons.firebaseapp.com/   https://free-3d-models.firebaseapp.com/ Full Stack Web Developer Coding Dojo - Bellevue, WA March 2019 to June 2019 Developed multiple full-stack projects.   RESTful API. Designed and developed many RESTful API projects. I have implemented full functional API based software using Node.js, ASP.Net Core, and Python.   Projects:

https://github.com/gaivoronsky80/Mongo/tree/master/mongoose/api/1955

https://github.com/gaivoronsky80/Mongo/tree/master/mongoose/api/restful_task_api

https://github.com/gaivoronsky80/Mongo/tree/master/angular/fetch_data/restful_tasks

https://github.com/gaivoronsky80/Mongo/tree/master/angular/fetch_data/api   Login and Registration. Designed and developed multiple robust login and registration applications. These included many different types of validation including client-side and server-side. I have completed these applications using Angular, Django, Flask, ASP.   Projects:

https://github.com/gaivoronsky80/flask-msql/tree/master/login_and_registration

https://github.com/gaivoronsky80/flask-msql/tree/master/email_valid_w_db

https://github.com/gaivoronsky80/Mongo/tree/master/mongoose/authentication/login_registration

https://github.com/gaivoronsky80/ASP-MVC-II/tree/master/Simple-Login-Registration

https://github.com/gaivoronsky80/Entity-Framework-Core/tree/master/LoginAndRegistration

Messaging and Blogging. Developed and implemented multiple messaging and blogging applications. These included public and private systems, administration, and user options and

control. These included full database creation. These projects were created using the full MEAN stack, .Net Core/ASP, Python/Flask and Python/Django among others. Projects:

https://github.com/gaivoronsky80/three_d_models_stock

https://github.com/gaivoronsky80/flask-msql/tree/master/private_wall

https://github.com/gaivoronsky80/flask-msql/tree/master/semi_restful_users

https://github.com/gaivoronsky80/Mongo/tree/master/mongoose/mongoose/message_board

https://github.com/gaivoronsky80/Mongo/tree/master/angular/quote_ranks

https://github.com/gaivoronsky80/Mongo/tree/master/angular/dom_manipulation/rate_my_cakes

https://github.com/gaivoronsky80/Mongo/tree/master/angular/let_s_eat

https://github.com/gaivoronsky80/Entity-Framework-Core/tree/master/BrightIdeas

https://github.com/gaivoronsky80/Entity-Framework-Core/tree/master/ChefsNDishes   Event or activity planning. Developed many activity and event organizing web applications. These have varied in complexity and functionality. The majority of these applications involved a front end, a server, and full database support.   Projects:

https://github.com/gaivoronsky80/Entity-Framework-Core/tree/master/WeddingPlanner2

https://github.com/gaivoronsky80/Entity-Framework-Core/tree/master/PartyFinder

https://github.com/gaivoronsky80/Entity-Framework-Core/tree/master/EventPlanner

https://github.com/gaivoronsky80/flask-msql/tree/master/got_got

https://github.com/gaivoronsky80/flask-msql/tree/master/lets_travel   Console, 2D Games. I have created a console Tetris clone using C#, 2D games using the Unity engine and Swift(iOS). The majority of these were solo projects for learning and personal growth. I have completed full games start to finish, including having a standalone application.   Projects:

https://github.com/gaivoronsky80/FlappyBirdStyle   https://github.com/gaivoronsky80/Snake

https://github.com/gaivoronsky80/Space-Game

https://github.com/gaivoronsky80/OOP/tree/master/Tetris Education Full-Stack Web Development Certification Coding Dojo - Bellevue, WA March 2019 to June 2019 Web design Certification IT Development - Kyiv March 2016 to June 2016 Master's in Architecture National University of

Construction and Architecture - Kyiv 2000 to 2006 Skills Microsoft visual studio, Visual studio code, C#, Django, HTML, Front End, Angular, Javascript, Python, TypeScript, CSS, SQL, JQuery, Flask, MongoDB, Express, Node.js, Mongoose, Asp.Net, Razor, Entity Framework Core, Ajax, JSON, Swift(iOS), MySQL Workbench, Postman, Sublime, Unity, Xcode, Microsoft Azure, AWS, Firebase, Adobe Creative Suite, 3D Studio Max Links http://linkedin.com/in/andrii-gaivoronskyi http://linkedin.com/in/andrii-gaivoronskyi http://github.com/gaivoronsky80 http://github.com/gaivoronsky80 Certifications/Licenses Full-Stack Web Development March 2019 to June 2019   Completed over 200 hours on project planning and implementation   Accumulated 1,000 hours of intensive study across three stacks; programming, testing, and debugging; to learn and form functional Web Applications   Developed three projects using: Languages: Python, C#, JavaScript, TypeScript, HTML, CSS, SQL Libraries/Frameworks/Tools: JQuery, Flask, Django, MongoDB, Express, Angular, Node.js, Mongoose, ASP.NET, .NET Core, Razor, Entity Framework Core, AJAX, JSON, Swift (iOS) Programs: VSCode, MySQL Workbench, Postman, Sublime, Microsoft Visual Studio, Unity, Xcode Web design Certification April 2016 to July 2016
