Web Developer Web Developer Web Developer - Ulta Lab Tests, Scottsdale Work Experience Web Developer Ulta Lab Tests, Scottsdale March 2018 to Present Designed and implemented a project management tool that serves as the central hub for all day to day company tasks. This tool 1.) Enabled company officers to hire more employees because projects and tasks became organized 2.) Tied together different aspects of the business, such as customer service work, client-based projects and pricing issues and made them accessible through a single tool 3.) Documents all work done and indexes them by Patient, Account or Order associated to the project ? Developed an item pricing tool which guides the user to pricing items for profit. The true power behind this tool is its simplicity. With minimal training and guidance, even non-officers can effectively price items in a matter of minutes. Software Engineer Intern Intel, Chandler October 2016 to December 2017 Optimized electrical validation speed by redesigning Python API; This yielded in a 400% productivity boost because it enabled non-programmers and programmers alike, to easily use the API ? Engineered a web-app that provided standardized structure for data collection and live data updates from servers. Education BS in Computer Science Arizona State University 2017 Skills .net, Microsoft visual studio, Visual studio, C#, C++, Javascript, Bootstrap, Vue.js, Python, Database, Microsoft sql server, Sql server, Mysql, Sql, Ajax, Asp, Css, Iis, Mozilla, Web server
