Front End Developer Front End Developer Front End Developer - Chrome River Technologies Work Experience Front End Developer Chrome River Technologies - Los Angeles, CA January 2018 to Present Building the Front End part of a client facing product with Javascript ES5 and ES6. To implement perfect pixel UI we use React Javascript library. I use Radium inline styles to manipulate CSS in Javascript. Javascript testing utilities, Enzyme and Jest, are used to unit test. Our middle tier was implemented in NodeJS. I use git version control to create a branch from master, test, create pull requests, get reviews then finally merge to master branch in github. Certified ScrumMaster Chrome River Technologies - Los Angeles, CA June 2015 to January 2018 In charge of Scrum process for US and offshore teams. Help teams follow Scrum testing best practices. Able to setup features and its MySQL data to reproduce issues. Interacting and coordinating test activities across multiple teams including management. Lead Manual Tester Chrome River Technologies - Los Angeles, CA September 2013 to June 2015 Lead manual tester for flagship product. Wrote understandable test cases and provided detailed information such as HTML payload and log errors. I was able to reproduce issues in any environment (dev/staging/qa/production) that differ in configuration. Engineer Consultant Cornerstone OnDemand / Santa Monica April 2013 to September 2013 Tested and automated APIs for E*trade, Texas Instrument, IBM and others using SoapUI and Apache JMeter tool. I was the only individual contributor to this project and created test cases from start to finish with minimal help. Education B.S. in Computer Science in Computer Science Cal State Long Beach
