Web Developer Manager Web Developer Manager Developer Chesterland, OH Development is really just problem solving and thats what I do. You can throw any language at me and I will learn it because I think and work like a developer. I have proven my problem solving skills in the legal world and look forward to continuing to use them in the development world. I come with a strong recommendation from one of top data analytics firms in the world. There I worked with the Chief Technology Officer and Chief Analytics Officer to develop a SPA to meet their needs. Authorized to work in the US for any employer Work Experience Web Developer Manager Goldstein Group Communications - Solon, OH June 2019 to Present Plan, bid, break into tasks, test and deploy all Magento projects handled by the firm.   Lead the team producing custom extensions using the full stack, PHP/ZEND, MySQL, XML, HTML, CSS, JavaScript and jQuery to produce the desired results whether it be a unique landing page for customer groups that login or custom category pages that let the user build the product or other modifications.   Implemented the Bootstrap framework to streamline the frontend development process, while using PSDs to create pixel perfect responsive representations. Design and secure restful APIs in PHP and MySQL to call JSON and various data to build a web application, that will eventually be made into an app for mobile devices that uses Magento and WordPress as the CMS.   Develop connectors for ERPs and CRMs to integrate data with Magento using things like Cron jobs and APIs.   Deploy, maintain and secure LAMP servers for development and production from installing the OS, Apache, MySQL, and PHP to advanced caching for production time.   Manage workflow with the database always getting pulled from the server and code always being pushed up from local to staging then tested and finally production.   Work with local and overseas teams to complete projects on time, in budget, and up the highest standards by maintaining a GIT and using various forms of communication to develop a relationship with the colleagues.   Meet with clients and help them decide and deploy the best possible CMS for their needs. FRONT END DEVELOPER DF SUPPLY INC. - Streetsboro, OH October 2018 to Present Work with the team, to get input and give constructive criticism to make the best possible product. Design, test, deploy, maintain a theme, and my custom modules for around fifty Magento sites. Maintain many more websites, some built on very outdated technology and some using other CMSs.

Use an understanding of PHP and MySQL to not only be able to locate the information that is needed to be displayed on the page for user but also embed things like Rich Snippets for SEO. Design Modules so that the average user can use them to create and add dynamic content. Deploy, and consume internal and external APIs returning different formats to display what the end user needs whether it be a report for management or consumer from product information. Prioritize tasks as they come through to deal with everything from how to display the correct information to how to make sure our sites are up and accessible.
