Senior Frontend Developer Senior Frontend Developer Columbia, MO I'm a web developer, designer, and accessibility advocate, and am currently looking for remote positions as a full-stack or front- end developer, accessibility specialist, team lead, or strategist.   I've been led by my passion for learning and a desire to build projects that are accessible to people with disabilities. In the past nine years, I have consulted, designed solutions, websites, branding, and/or coded for 125+ clients, always focusing on the client's goals and the people using the product.   I love solving complex problems that challenge me to learn, code, and design better than I ever have. I'm looking for a wonderful, talented team who is passionate about making a goal-focused, accessible product. Work Experience Senior Frontend Developer got2go2 September 2018 to Present Working with a small team of developers, I'm responsible for the front- end implementation of a quickly-moving startup. We use Vue with a custom-built API to power all instances of our progressive app product. Key responsibilities: - Integrating a complex map using Leaflet, Map tiler, and Vue to maintain a persistent, performant state on the app - Customizing web pack for an ideal development and production build - Building maintainable, useful Vue components - Improving performance whenever time allows - Building an accessible product from the start The University of Texas Austin - Center for Media Engagement - Austin, TX September 2015 to Present Remote The Engaging News Project researches democratically-beneficial and commercially-viable ways for journalists to engage with their readers. I strategize, design, develop, and maintain the online tools that the Engaging News Project has identified as beneficial via their research. Major Project - Quiz Creator Read about it: http://jeremyjon.es/portfolio/the-quiz-creator/ See it: https://engagingnewsproject.org (Click "Quiz Creator" link & Register) Code: https://github.com/engagingnewsproject/engaging-quiz Responsibilities - Back- end Development (PHP, JS) - Front- end Development (PHP, JS, HTML5, CSS, SCSS) - Design (UX, UI) - WordPress Theme and Plugin Development - Research project design for development and data collection. - Create project proposals (including gap analysis and feature descriptions) and oversee their implementation. Owner, Designer March 2009 to Present My web design and consulting company. This is the position that is the focal point of most of my work. I specialize in custom designs fully coded in html/css then adapted to Wordpress or other

high-quality CMS's. I also work frequently for marketers looking to implement split-testing and analytics to improve conversion rates on targeted goals. Lead Web Developer Texas Monthly March 2017 to September 2018 1 year 7 months) Remote Contracting as Texas Monthly's lead web developer, I've led and worked on several major projects for them including: - Migrating and consolidating TIMBUKTU.com into Texas Monthly.com, including restructuring and merging data. - Added a video channel - Led web development on a major Texas Monthly.com redesign with the agency Up statement. - Added Google AMP support - Many, many customizations - Basically being the sole developer (server, database, back- end, front- end) for all of Texas Monthly.
