Front end Developer Front end Developer Front end Developer Beaverton, OR Work Experience

Front end Developer TekSystems - Beaverton, OR January 2017 to March 2019   Built an internal tool to assist and improve the sales and merchandising team's ability to filter, sort, select, and group products according to client needs for upcoming seasons.   Full Stack Developer working on a 30 person agile team using primarily React, JavaScript, HTML, CSS, and Node.   Built reusable web components for reuse throughout the application along with other, unrelated, applications within the department.   Helped create and update style-guide for UI development.   Worked closely with UI/UX designers to help communicate the complexity, risk, and effort of each feature they brought to us.   Created an easy to use UI experience for users with features like complex filtering and sorting, user profiles with in-depth customization options, and displaying products in different ways to better present data to the user.   Worked partially remotely, several days a week. Communicated almost exclusively through Slack and via phone when needed.   Released application to Alpha and Beta then to full release and then continued to do maintenance till end of contract. Angular Developer Choice Hotels - Beaverton, OR January 2015 to October 2016   AngularJS Developer on an agile team working to an internal hotel reservation system from scratch with features based off of their legacy application.   Worked with AngularJS, Bootstrap, JavaScript, Less, HTML, Jasmine, Protractor and Gulp.   Main focuses included creating responsive UIs for various mobile devices and adhering to strict ADA standards.   Released complete reservation system from initial hotel search all the way through payment via credit card. Software QA Lead Choice Hotels - Portland, OR July 2014 to January 2015   QA Lead on a large agile team which developed the web shopping experience for individual health insurance through BridgespanHealth.com.   Worked with testing technologies such as TestNG, Selenium, Maven, JavaScript, JQuery, Bootstrap, Grunt, Sass, CSS3, HTML.   Assured quality of features and reported bugs to developers.   Worked closely with developers to demonstrated bugs, performance issues and verify big fixes. Software Development Intern Choice Hotels - Beaverton, OR March 2013 to August 2013   Completed a five month internship with Catalyst DevWorks which included extensive training on software development fundamentals as well as web design and basic website creation.   Completed training projects that

involved technologies such as Java, Spring, Hibernate, JUnit, Maven, JavaScript, JQuery, CSS3, HTML, MySQL, RESTful web-services, JSON, and Agile/SCRUM.
