Solutions Developer/ Software Developer/L3 Support Solutions Developer/Software Developer/L3 Support Solutions Developer/ Software Developer/L3 Support - Getronics Southport, NC Work Experience Solutions Developer/ Software Developer/L3 Support Getronics January 2018 to Present Remote I develop and maintain the software for IBM's print infrastructure.   Consistently deliver top notch solutions to IBM.   Originally was hired as a Java developer to work on the three main print management web applications (JavaEE). However, after consistently scoring exceeded expectations during reviews I was trained to take over an additional role. This new role was originally held by an IBM employee with 20 years of experience. I now am responsible for both roles.

   This additional role is development and support of 8 applications, across 3 operating systems (Windows, MAC, Linux), using 5 different languages (Python, C++, PERL, Objective-C, C#).   Both roles also require the creation of smaller shell scripts and Python programs.   One example of a smaller software program that I have built is a Python program that syncs the data on the production and backup servers to ensure that mission critical data is backed up. Software Developer Red Technologies Incorporated - Raleigh, NC January 2017 to August 2017 Created software solutions for a startup company.   Created custom software solutions for various clients using Wordpress, HTML, CSS, Javascript, C#, Java, SQL Server, and MYSQL. Software Developer/IT Technician/Front Office G&E Golf Cars LLC - Fayetteville, NC February 2012 to March 2016 Created software solutions for a small business and handled front office operations.   Created custom web and desktop software solutions for the business using C#, Java, Javascript, CSS, HTML, SQL Server.   Completed IT repairs on software and hardware.   Handled phone calls from customers and other front office duties.
