Front End Web Developer Front End Web Developer Front End Web Developer - Innuative Digital Agency Claremont, CA I have over 11 years of professional experience working as a front end web developer in a team environment for various development teams, working closely with designers and marketing teams producing high fidelity and responsive designs, and back end programmers producing dynamic front end templates that work with various back end applications. I work with git for version control, Jira and Asana for task management, and Agile methodologies for project management. I have over a decade working professionally with content management systems such as Wordpress, Magento, and Shopify. I am accustomed to using Scrum / TeamViewer / Slack to keep in touch with teammates, and I am an effective communicator / problem solver who believe strongly in actions that produce measurable results. I am always striving to learn more and expand my skill set as a web developer. I have many professional references available upon request.
