Responsible for designing the site, gathering properly licensed stock photography, selecting great looking font pairs and choosing the color scheme based on client discovery calls. Find compatible plugins & troubleshooting them when necessary. Set up WooCommerce & related payment gateways. Launch websites and teach clients how to use their sites. Front- End Web Developer Brandefined April 2015 to April 2016 As a front-end web developer at Brandefined I help small business owners craft their websites. In this role I began by taking an initial consult call where I'd listen to the clients, ask questions and advise. From

there I'd begin by creating a wireframe and site map. After getting the client's approval I'd begin to craft the client's WordPress website using approved colors and logo. During the process I'd get feedback and approval via email, phone calls and chats. Jr. Front- End Web Developer EdgeLink May 2015 to June 2015 Placed at CMD Agency in the Pearl district. My role has been to assist in building the Bootstrap framework for the details section of a well known Windows & Doors website. In this role I worked heavily with Git for version control and JIRA & Basecamp for project management bug tracking. I used LESS extensively for the CSS via Gulp & package compiling via Grunt. We also rebuilt our DB every morning Using HeidiSQL & importing to PHPmyAdmin. I was also responsible for making sure the website was responsive and fixing bugs with broken layout and CSS. Jr. Front- End Web Developer Manifest Web Design February 2014 to April 2015 Recently worked as a junior web developer working mostly on coding custom WordPress site based on provided mockups. Manifest Web design is a software development company. My role was to build the front end of web applications and maintain legacy websites. Jr. Front- End Web Developer Fish Marketing January 2014 to September 2014 Recently worked as a junior web developer creating emails & websites from scratch. Most of the newsletters and emails were custom coded based on mockups from the creative department. Any updates to email templates created before my tenure at fish are done using old fashioned tables. Testing is and sending is done via Lyris with rounds of test emails to various email accounts, which are then viewed on mobile devices and tablets. Updates can be simple requests or can be complicated changes within the CMS using a template externalizer. Jr Front- End Web Developer Fish Marketing February 2014 to May 2014 Served as primary coder for Spanish Marketing Department. Coordinated with the designers in order to get needed style guides, mock up files and assets. Maintained existing sites and crafted new sites based on provided assets. Responsible for coding slides, advertisements, email templates based on provided Design Mockups from the Spanish and English marketing Departments. Hand coding from scratch, customized WordPress themes, and some .asp via Visual Studio. Collaboration and code reviews were done via Git. Education Associate degree in Web Graphic Design DeVry University October 2010 to August 2012 Commercial Driver's License (CDL) Class B

Expires: August 2021 State: OR Endorsements: P (Passenger vehicles) - S (School bus)) Skills Class B, CDL, CDL-B, Cdl Driver Certifications Class B CDL
