Front End/UI Developer Front End/UI Developer Front End/UI Developer - Camico Mutual Insurance

Pleasanton, CA ? Over 3+ years of experience in UI development, Front end development, rich user interface design, development, web specifications and documentation. ? Experience in Software life cycle phases like Requirement Analysis, Implementation and estimating the time-lines for the project. ? Extensive experience in designing professional UI web applications using front- end technologies like HTML5, CSS3, JavaScript, XML, XHTML, jQuery, AJAX, JSON. ? Profound knowledge in Angular JS concepts like Dependency Injection, Promises, Services, Scopes, Controllers and Directives. ? Proficient in Single Page Application development using AngularJS. ? Experience in using AngularJS along with JSON to parse response data for user interface pages. ? Expertise in creating User Controls, Web Forms and client side validations using JavaScript, jQuery and Angular-JS ? Experience in developing applications using CSS3 Media Queries, SASS, LESS and Responsive Web Design making. ? Good at techniques like bundling and Minification in angular to reduce the compile and run time of the application. ? Expertise in designing and developing User Experiences for Web Applications. ? Excellent experience in developing web pages complying with Web Content Accessibility Guidelines (WCAG) and ability to apply W3C web standards. ? Experience in using multiple IDEs such as WebStorm, Sublime Text, Brackets, Notepad++. ? Excellent experience in Restful Web services and development. ? Extensive understanding in Agile methodology and Software Development Life Circle (SDLC). ? Experience with Version Control tools like CVS, VSS and SVN for Source Code version management and merging Source code after intermittent Project releases. ? Experience in Agile methodologies such as Extreme Programming, Waterfall Model and Test Driven Development. ? Good in communicating with clients, customers, managers and other teams in the enterprise at all levels. ? Effective problem solving skills, outstanding interpersonal skills, good in written and verbal communication. Ability to work independently as well as within a team environment. Driven to meet deadlines. Motivated to produce robust, high-performance software. Authorized to work in the US for any employer Work Experience Front End/UI Developer Camico Mutual Insurance - San Mateo, CA February 2017 to Present San Mateo, CA Feb 2017 - Till Date This application will be used by

different audiences who will be served through this site, which will include: agents, retailers, policyholders and claimants. The goal is to provide a single, consistent entry point where customers can perform queries, access reports, and obtain information on claims and policies. Role: Front End/UI Developer Responsibilities: ? Implementing the Design and developing modules using Agile Methodology. ? Used Model View Controller framework such as Angular JS framework for creating Single Page Application. ? Responsible for creating efficient design and developing User Interaction screens using HTML5, CSS3, JavaScript, JQuery, AJAX and JSON. ? Used JavaScript, jQuery for user interactions in pages.   ? Worked on creating responsive website for smart devices using responsive design and media queries, using technologies like Bootstrap.   ? Utilized various JavaScript and jQuery libraries, AJAX for form validation and other interactive features.   ? Successfully performed the Restful APIs Integration using XML and JSON. ? Used CSS Sprites to decrease the number of HTTP requests and load time of web pages.   ? Involved in development converting the static HTML mark-ups to JSP's. ? Used SASS Preprocessor for CSS preprocessing. ? Developed applications using AngularJS single page applications to improve page performance. ? Developed reusable components using Custom Directives in AngularJS. ? Reconstructed front-end system in React JS by designing React reusable components and lifecycles. ? Responsible to gathering requirements and creating the right solutions with our Marketing SAAS Cloud products. ? Used JQuery & Ajax for service calls on pages to interact with the server for information. ? Defined new validations through Angular.js for the form field validation implemented through HTML5. ? Produced visually appealing designs focused on usability, utility, UX, cross-browser. ? Participated with SQA team in bug thrashing sessions to discuss and resolve bugs that were reported in JIRA. Environment: HTML5, CSS3, DHTML, JavaScript, jQuery, Angular.js, Node.js, React JS, Responsive Design, Bootstrap, AJAX, SVN, Adobe Dreamweaver, Web services, XML, XSLT, Agile Methodology, Windows, Front End/UI Developer Beneficial State Bank - Oakland, CA October 2015 to January 2017 Oakland, CA Oct 2015 - Jan 2017 The current Project is developed to build a common and dynamic application interface to allow applicants to select, apply and receive a decision for multiple banking products and deposits (Checking, Saving, Debit Cards), Credit Cards,

Mortgage, Brokerage Accounts (Mutual Funds) for various delivery channels E-Commerce, Banking Center and Partners Site with the help of single sign On (SSO). Role: Front End/UI Developer Responsibilities: ? Involved in various phases of Software Development Life Cycle (SDLC) of the application like Requirement gathering, Design, Analysis and Code development. ? Done the design, development and testing phases of Software Development using AGILE methodology and Test Driven Development (TDD). ? The Existing application has tabs whose content is loaded through iframes .Now the application has to be changed to SPA (single Page Application) using Angular.js framework. ? Used Dependency Injection (DI) concepts in Angular JS. ? Participated in making Responsive Web Designs using Media Queries and Bootstrap, JQuery-Mobile. ? Developed dynamic web pages using HTML5, CSS3, JavaScript, jQuery, AngularJS, Bootstrap and Ajax. ? Created various Angular Services & injected them into Angular controllers (using Dependency Injection) to enable Ajax calls and created custom directives to create own HTML tags and induce functional behavior to those tags. ? Collaborated with a team and successfully designed Web Apps with React JS. and Structured the JavaScript code using Angular JS. ? Created AngularJs components, implemented Interpolation, input variables, Bootstrapping, NgFor, NgIf, Router Outlet, binding the click event, Component decorator, binding to the hidden property. ? Used Bootstrap and Angular UI Bootstrap for creating rich, Responsive UI Screens for varying screen sizes and devices. ? Implemented nested views and routing using Angular UI Router as per the requirement. ? Created various Angular directives, controllers, DOM, expressions, templates, data binding, etc. ? Wrote media queries and designed the application using Responsive web design tool Bootstrap. ? Developed modules like configuration module, create module and developed routing files for routing each page. ? Implemented front end user interface and features in the application using AJAX. ? Used jQuery and coded JavaScript for page functionality and Light box plug-in. ? Coded pages with best Search Engine Optimization (SEO) techniques. ? Used GitHub as a version control, and used JIRA for bug management. Utilized Agile Methodologies (Scrum) to manage full life-cycle development of the project. ? Followed agile methodology for developing the application. ? Work with source version control tool GIT to manage the code repository. Environment: HTML5, CSS3,

JavaScript, JQuery, JQuery Mobile AJAX, AngularJs, SPA, Bootstrap, REST, Node.js, XML, agile, Jira, GIT, Windows. Web Developer Vadodara, Gujarat February 2014 to January 2015 Responsibilities: ? Worked in a team, Involved in developing the UI, layout and front- end programming (HTML) from wireframes. ? Involved in Enhancement of existing application utilizing JSP, Created HTML navigation menu that is role based menu items changes dynamically, derived from the database in the form of XML. ? Utilized various JavaScript and JQuery libraries, AJAX for form validation and other interactive features. ? Developed reusable AngularJS directives. ? Developed GUI using JavaScript, Angular and React JavaScript, HTML, DOM, XHTML, AJAX, CSS and JQuery Mobile, Backbone.js in on-going projects. ? Converted UI screens from XMI (XML Metadata Interchange) framework to AngularJS framework which resulted in better performance and reduced code count. ? Involved in preparation of test cases for unit & integration testing and User acceptance testing. ? Converted the mock-ups into hand-written HTML, CSS, XHTML, JavaScript, JQuery, AJAX, XML and JSON. ? Interacted with java controllers (JQUERY, Ajax, and JSON to write/read data from back end systems). ? Involved in writing application level code to interact with APIs, Web Services using AJAX, JSON and XML. ? Applied advanced HTML, JavaScript, and CSS to deliver cutting-edge user interfaces using material design components in Angular JS. ? Created forms to collect and validate data from the user in HTML and JavaScript. ? Active participation throughout the entire software development lifecycle from project inception, to code development and elaborate testing of the various modules. ? Used agile methodology for the software development. ? Developed SQL queries to perform insert, update or delete operation on MySQL database. ? Responsible for authoring of website functionality with JavaScript, HTML, CSS. ? Used CSS Sprites to decrease the number of HTTP requests and load time of web pages. Environment: HTML, Angular.JS, JavaScript, AJAX, CSS, JSON, JQuery, XML, agile, Apache and Windows. Education Master's Skills Angular JS (3 years), Bootstrap. (2 years), JavaScript (3 years), JQuery (3 years), XML (3 years) Additional Information TECHNICAL SKILLS: Languages JavaScript, HTML5, CSS3. Web AngularJS, Bootstrap, NodeJS, JavaScript, Jquery, JSON, XML SDLC Agile, Waterfall Servers Apache Web Services RESTful Tools Webstorm, Sublime, Notepad++, GitHub, Chrome,

Mozila Firefox, Xampp, Wampp Operating systems Windows Variants
