Oracle DBA Oracle DBA Oracle DBA at CHAVERAN Inc Burtonsville, MD ? Administrative understanding of Oracle 10g and Oracle 11g ? Executing Oracle database tasks for Client Database Service Level guarantees ? Monitoring, troubleshooting & resolution of failed tasks Knowledge of Installation, maintenance, troubleshooting, patching, administration, performance tuning, upgrading and database creation ? Perform database backup and recovery tasks using RMAN (strong Oracle RMAN backup & recovery skills) ? Develop and document database and strategies, tools, performance tuning methods, and backup and recovery methods for staff. ? Responsible for installing Oracle software & creating Databases, schemas, database storage - tablespaces and datafiles. ? Refreshing development & test schema/tables using Export/import, Datapump ? Expert level knowledge of creating and maintaining Tables, Partitioning, indexes, ? Participate in a DBA team-environment supporting mission-critical databases on both UNIX and Windows operating systems. ? Create, maintain and modify tables, indexes, and other objects. Design, develop, ? Performance Tuning of Oracle Database & SQL, PL/SQL Queries. Conversant with AWR, ADDM ? User Account Management, creating database users, quota, roles, privileges etc ? Writing shell, batch scripts, SQL scripts   OS: ? Windows 2003 Server, Vista, XP, 2000, 98, ? LINUX. and UNIX, bash scripting. ? Installation and configuration of OS on new servers Software: ? Oracle 11g, 10g, 9i ? Active Directory ? Remedy Ticketing System Work Experience Oracle DBA CHAVERAN Inc August 2008 to Present Install and configure Oracle 9i, Oracle 10g and Oracle 11g on Windows and Red Hat ? Perform 10g to 11g databse upgrade ? Create and implement backup strategies ? Use SQL*Loader to perform ETL operations on the database. ? Write scripts/procedures/triggers in PL/SQL ? Use import and export utilties to migrate and backup data. ? Performed basic DDL and DML to create databases according to business requirements. ? Write, test and implement RMAN backup and recovery scripts ? Developed scripts to monitor database and system performance ? Streamline databasse and increased the overall efficiency and performance level ? Development and documentation for sql statements in implementing reports ? Under supervision tune SQL queries using table indexing and table partitioning ? Participated in various projects that required the installation, configuration and administering of several Oracle

databases for development and training purposes. ? Trained and monitored interns and students in the use of SQL and PL/SQL ? Creating and multiplexing datanase control and data files to provide fault tolerance ? Performing point in time recovery for development instances. ? Tuning and implementing flashback recover. ? Oracle networking configuration, including SQLNET.ora and TNSNAMES.ora ? Creating and managing users using roles and permissions. ? Performance Tuning - Install, configure and use of STATSPACk and Automatic Workload Repository to diagnose performance problems.   REFERENCE References will be provided upon request. Oracle Database Administrator Chaveran Inc. - Bowie, MD August 2008 to Present Education Bachelors of Science in Information Systems Strayer University Present
