Front-End Developer Front-End Developer Front-End Developer - Kenzan Media LLC Boston, MA I am a mid-senior level developer with a solid foundation in testing who is looking to continue growth at an innovative company. I have consistently exceeded the stated goals and deadlines. I work well on individual projects and as a member of cross-functional development teams. I am capable of working on projects of any size from small tasks to enterprise-level sites. I am very organized with exceptional multitasking and technical documentation skills.   I have experience working in conjunction with project managers, designers, and fellow developers on applications from conception through launch and beyond. I have actively participated in development teams of various sizes to ensure timely completion of tasks and projects. I employ analytical skills to review system needs, gather requirements, plan scopes of work and ensure sites meet business objectives. Thoroughly document and debug code to provide maximum availability and extensibility.
