Senior Front-end Developer Senior Front-end Developer Senior Front-end Developer Work Experience Senior Front-end Developer Varidesk July 2018 to October 2018 Responsibilities Helped design and develop a modern, modularized, universal app to eventually replace current production site.   Focused design and development for deployment in multiple languages and cultures following internationalization best practices.   Worked with Headless CMS framework to enable marketing team to seamlessly update campaigns and branding in multiple languages.   Reworked UI, while also following management's business requirements, to make the page responsive and mobile-friendly but also seamlessly integrate with new and existing services.   Integrated GraphQL data layer, fringe micro services, and server side rendering to increase page speed, future-proof design, and modularize a monolithic workflow.   Developed API routes to be utilized for integrating backend services to frontend UI.   Developed documentation for team processes and then distributing that knowledge to new hires, relevant team members, and management.   Trained new hires on workflows, styling guidelines, and development strategies.   Environment   Universal Nuxt.js app with .Net micro services managed via Kubernetes.   Supported transition to responsive design.   Photography and design work completed with latest version of Adobe Photoshop, and Illustrator.   Typescript, Javascript, HTML, CSS, SCSS coding languages focus.   Utilized REST APIs to create, read, update, and delete data. Angular/Adobe Analytics Developer Citibank April 2018 to June 2018 Responsibilities   Worked on a team tasked with the design and development of analytical data used by Citibank on Angular 2-5 and legacy pages and applications that run off a variety of backend systems.   Researched and developed Proof of Concept designs, workflows, and environments.   Developed and implemented automation strategies.   Researched and wrote testing scripts and procedures with Selenium.   Created Chrome extensions to aid in development, testing, and automation.   Conducted interviews for potential new hires.   Developed documentation for team processes and then distributing that knowledge to new hires, relevant team members, and management.   Created wireframes and demonstrating POCs with Angular 6.   Designed and building REST APIs for development use.   Deployed AWS Serverless for use in services, API, and frontend development.   Data manipulation

for seamless integration to legacy and planned systems.   Environment   Mixture of Angular of Legacy pages and application utilizing in-house components and style-guides to create hundreds of mission critical Citibank pages and services.   Supported transition to responsive design.   Selenium testing.   Photography and design work completed with latest version of Adobe Photoshop, and Illustrator.   Typescript, Javascript, HTML, CSS, SCSS coding languages focus.   Utilized REST APIs to create, read, update, and delete data. Lead UI/UX Designer T.G. Mercer March 2017 to September 2017 Responsibilities   Worked with upper management and potential users to plan a new application's layout and workflow, prioritizing necessary components for initial release, creating wireframes and mockups, and setting long-term expectations for the application's later releases.   Oversaw the creation of wireframes and design standards for the application and its components.   Built a mobile-first, responsive front end with the latest released Angular version and Angular Material components.   Acted in roles such as SEO, Web Development, QA Testing, etc as necessary.   Environment   Angular (versions 2 - 5) front-end utilizing Google's Material Design guidelines to create a responsive web app built with Node.js on a Java/MySQL/TomCat backend.   Utilized responsive design libraries such as Bootstrap and PrimeNG   Tortoisegit version control   Protractor E2E testing   Grunt task runner.   Photography, graphic, and videography work completed with latest version of Adobe Photoshop, Illustrator, and DaVinci Resolve.   Javascript, Typescript, HTML, CSS, SCSS coding languages focus.   Utilized REST APIs to create, read, update, and delete data. Senior Web Developer Clay Fox Creative August 2016 to March 2017 Responsibilities   Designed and deployed to-order responsive, mobile-first websites at client specifications.   Utilized responsive design libraries such as Bootstrap and Foundation.   Projects varied from recruiting firms to professional athletes.   Required a wide array of necessary skills, adaptability, and high level planning to design wireframes, mockups, styling themes, and workflows.   Utilized REST APIs to create, read, update, and delete data.   Environment   Wordpress, Foundation, and jQuery front-end with PHP/MySQL backend utilizing guidelines from clients' marketing campaigns to create websites, advertisements, online communities, and E-commerce platforms.   Git versioning for team collaboration on projects.   Photography, graphic, and

videography work completed with latest version of Adobe Photoshop, Illustrator, and DaVinci Resolve.   Javascript, PHP, HTML, CSS, SCSS coding languages focus.   Utilized REST APIs to create, read, update, and delete data. Project Lead at District Attorney Denton County August 2015 to March 2016 Responsibilities   Lead many-faceted team that overhauled the UI, architecture, database, and reporting of the District Attorney's Evidence Management System.   Consulted D.A. officials on the creation of standard operating procedures, documentation, training and took their input to create wireframes, mockups, and demos for potential design solutions.   Position required long term and high level planning, coordinating several departments, and strict implementation and adherence to security and privacy policy.   Utilized REST APIs to create, read, update, and delete data. Environment   Customized MVC front-end with .NET/MySQL-based backend to create secure electronic filing, dissemination, and storage system for the Denton County courts, police, and defense attorneys.   Javascript, PHP, HTML, jQuery, CSS, MySQL coding languages focus. Web, App, and Graphic Designer Denton County Applications Development October 2014 to August 2015 Responsibilities   Assisted in the design, creation, and deployment of the county's website that served over 40 departments.   Created digital media for county use.   Utilized Bootstrap for responsive design.   Created, maintained, and debugged applications for the departments of Denton County. Environment   Sitecore front-end with .NET-based backend to create and maintain an official county website.   Versioning was controlled through Sitecore   Photography and graphic work completed with latest version of Adobe Photoshop and Illustrator.   Javascript, PHP, HTML, jQuery, CSS, SCSS coding languages focus. Freelance Web Developer May 2013 to October 2014 Responsibilities   Created websites, logos, and digital graphics for clients.   Designed Business Applications for work automation.   Utilized responsive design libraries such as Bootstrap and Foundation.   Assisted clients develop digital marketing campaigns and strategies. Environment Wordpress, Foundation, and jQuery front-end with PHP/MySQL backend to create websites, logos, and original content for clients.   Photography and graphic work completed with latest version of Adobe Photoshop and Illustrator.   Javascript, PHP, HTML, jQuery, CSS coding languages focus. Education B.A. in Spanish University of North Texas August 2007 to May 2010 Skills Front-end,

Illustrator, Wordpress, Git, Javascript, Bootstrap, Node.js, Typescript, Oop, Php, Laravel, Soa, Rest, Mysql, Html5, Mvc, Sass, jquery, Mongodb, Frameworks Links http://HeyGilbert.com Additional Information Professional Skills Teamwork   Communicating clearly with teammates and clients   Working independently with little guidance or in a group   Sharing knowledge with other team members via training and documentation   Interacting with clients to establish how best to meet their needs   Happily performing other related duties as required Development   Aligning small details with overall goals to ensure well-made applications   Analyzing large amounts of information for strategic planning   Strong habits of excellence, testing practices, and forward-thinking   Designing and implementing clients' custom software desires   Experience building front-end web applications with various back-end and vendor services, REST APIs, and traditional and MVC architectures   Building sound OOP and SOA plans for long term success   Experience working with and abiding with information and security policies and practices Technical Skills Languages HTML5, CSS3, Javascript, jQuery, SASS, SCSS, PHP, MySQL, MongoDB, Typescript, GraphQL Frameworks   Foundation Zurb, WordPress, Bootstrap, Laravel, Express, Sitecore, Angular, React, Vue, Nuxt, Metalsmith Tools   Git, Adobe Photoshop, Adobe Illustrator, Gulp.js, Yeoman, Node.js, XAMPP
