SQL DATABASE ADMINISTRATOR   Contract SQL DATABASE ADMINISTRATOR   Contract SQL DATABASE ADMINISTRATOR   Contract Austin, TX Work Experience SQL DATABASE ADMINISTRATOR   Contract Lexmark - Lexington, KY November 2018 to June 2019   Imported, exported, consolidated and cleansed SAP global revenue data with SSIS packages.   Created dozens of tables & stored procedures in SQL 2017 for staging 1 million customer contracts.   Tested and validated Power BI graphs & metadata integrity with SQL views as data sources. SQL DATABASE ARCHITECT   Contract CUNA Mutual - Chicago, IL May 2017 to October 2018   Loaded SSAS data warehouse for use in customer projection analysis with Power BI dashboards.   Updated stored procedures and charted data trends in SQL databases for all credit union customers.   Created and tested SSRS reports with BI analytics; implemented SSIS scripts & stored procedures.   Deployed credit union NoSQL databases & PowerBI graphs on AWS & Azure cloud servers.   Implemented 300 primary/foreign keys for table joins and data integrity in new data warehouse. SQL SERVER DEVELOPER   Contract Health First - Rockledge, FL February 2016 to April 2017   Created and updated dozens of SQL Server 2014 tables, views, SSRS reports & stored procedures.   Managed data migrations for Oracle/NoSQL databases and XML files using SQL tasks in SSIS packages.   Trained 3 junior software developers & 2 business analysts; implemented code refactoring. SQL DATABASE ARCHITECT   Contract Lockheed Martin - Baltimore, MD May 2015 to December 2015   Developed SSAS data warehouse for use in project bid tracking analysis with PowerBI dashboards.   Utilized Visual Basic.NET & Git for source control; implemented subqueries and CTEs in stored procs.   Documented all unit testing procedures and created data flow diagrams in MS Visio for entire project. SQL DATABASE ARCHITECT   Contract Triumph Group - Arlington, TX November 2014 to March 2015   Completed agile/scrum pilot migration project for 200 Oracle tables and data with Visual Studio 2010.   Replicated table schemas and synchronized surrogate key attributes for SQL Server 2012 databases.   Automated data imports for development & production servers using SSIS & merge stored procedures. SQL / SSRS DEVELOPER   Contract Babson Capital - Charlotte, NC May 2014 to September 2014   Optimized stored procedures for Everest financial application and improved management dashboards.

Ported numerous complex PowerPivot & SSRS drill-down reports and wrote custom functions. Developed & tested new Tableau reports with user input parameters in SharePoint user environment. SR. SQL DEVELOPER   Contract Bank of America - Charlotte, NC December 2013 to March 2014   Updated and tested SQL Server 2012 SSIS data mining packages & stored procedures for intranet applications that allowed portfolio managers real-time access to customer detail and summary views.   Revised SSRS reports and JAMS setups to integrate current ATA deployment and utilization data. SQL DATABASE ARCHITECT   Contract Wells Fargo - Charlotte, NC May 2013 to November 2013   Created new T-SQL scripts, databases, tables, pivots, functions & stored procedures for tracking hundreds of HRIT internet applications for any time period based on response time and availability.   Implemented SSIS scripts for creating entire database and importing Oracle data for ongoing updates. SQL SSIS / SSRS DEVELOPER   Contract Wells Fargo - Charlotte, NC July 2012 to April 2013   Utilized Business Intelligence Project designer and Visual Studio 2008 to develop SSIS ETL jobs and SQL 2008 R2 SSRS reports for use with SharePoint & Broadridge financial management software.   Completed table design and data modeling using surrogate keys from 4 TB Sybase SQL databases.   Updated dozens of tables, views & T-SQL stored procedures with complex joins and user parameters.   Optimized stored procedure performance and Excel output formats based on user acceptance testing. DATA WAREHOUSE ARCHITECT   Contract F.E.I. Company - Hillsboro, OR March 2012 to May 2012   Migrated Excel spreadsheets and Access databases to new SQL Server 2008 SSAS data warehouses. Streamlined Excel dashboard graphs with PowerPivot tables and links to SSRS BI reports. Created SSIS packages for detection & removal of foreign language letters from daily data imports. SQL DATABASE ADMINISTRATOR McCormick & Schmick's - Portland, OR February 2008 to January 2012   Added execute-on-demand functionality for Great Plains Dynamics 10 accounting database updates.   Enhanced SQL Server 2005 performance by minimizing blocking and adding indexes to all databases.   Designed indexed views and parameterized T-SQL stored procedures for Cognos 8 BI data warehouse hosted on a SharePoint web site for end-user access to 60 months of accounting data by unit & period.   Optimized SSRS ad-hoc unit report execution time from 5

minutes to less than 10 seconds. SQL SSAS WAREHOUSE DEVELOPER Contract Nike - Beaverton, OR April 2007 to December 2007 Improved and supported the Build-a-Report Business Intelligence application on SQL Server SSAS cubes; used Excel PowerPivot tables with clothing/shoe marketing data from all Nike product lines. Added new SSAS cubes for European data; verified integrity of 9 million new NPD records imported monthly. Modified MDX/DAX formulas to allow display constraints on data sets with less than 35 records. SQL DATABASE DEVELOPER Contract BPB Gypsum - Blue Diamond, NV October 2005 to February 2007 Designed a new Access 2003 database with unique indexes & wrote dozens of SQL stored procedures. Modeled BPB's entire sheetrock production line by completing conversion from Excel spreadsheets. Generated screens to capture all possible reason codes for down time, maintenance and product culls. Linked Access data to Excel graphs with VBA to generate AS/400 reports, shift summary dashboards. Prevented costly production line shutdowns by proactively tracking daily loss reasons and trends. SQL/ BI DEVELOPER Contract Harrahs - Las Vegas, NV April 2005 to September 2005 Created Excel dashboard for hotel management to track revenue & incentive program effectiveness. Wrote SQL queries to summarize enterprise data from nightly batch downloads and to automatically refresh 99,000 new records each day (up to 4,760 per hotel) from an Access database backend. Generated VBA procedures with dynamic SQL that allowed over 10,000 unique graphs combinations. SQL DATABASE ADMINISTRATOR Inova Management - Las Vegas, NV June 2004 to April 2005 Supervised creation & maintenance of all SQL databases, VB6 applications & Access databases. Optimized and tuned performance & indexes for all SQL Server 2000 OLTP databases and log files. Created scripts for replication of VB.NET & SQL databases for new health care / fertility clinics. Documented 300 pages of application features to allow medical staff training & manager summaries. https://www.linkedin.com/in/trexcel-store-80325739 Education Bachelor of Science in Accounting Oral Roberts University - Tulsa, OK Skills Stored procedures, Ssrs, Data warehouse, Etl, Data quality Additional Information Summary of technical skills - ? Eliminate blocking on production servers ? Resolve locking issues / deadlock contentions ? Manage size of transaction logs and truncate if too large ? Convert procedures with table reads to

views or functions ? Improve performance of complex stored procedures ? Use parameters to avoid table scans of large tables ? Add appropriate primary key indexes to tables ? Add foreign key table joins for referential integrity ? Create SSAS data warehouse for data quality / reliability ? Create SSIS packages to automate scheduled ETL jobs ? Create SSRS reports to track baseline performance / trends ? Create PowerBI dashboards with key performance indicators   Timothy L. Mc Irvin   Architect & Sr. Developer-level skills - last used in 2019
