Front End Developer Front End Developer Web developer San Diego, CA A full stack developer with nearly 4 years of experience designing, developing and maintaining complex web applications. Authorized to work in the US for any employer Work Experience Front End Developer BVA - San Diego, CA August 2018 to Present As a front end developer at the largest shopify partner agency in the world. I was tasked with developing seamless user experiences from UI mockups and project specifications. Using technologies like react, graphql, and sass.   One of my favorite (and most successful) projects was for orosapparel.com. Through the collaboration of a third-party design agency, our marketing team, and my development efforts we were able to increase the sites revenue from ~20K monthly to ~20K a day. Front End Developer Orkiv Retail Solutions June 2016 to August 2018 I worked closely with the founder and CEO to design and develop fully custom eCommerce solutions for clients. I also did in-house development to aid the marketing efforts of Orkiv's SaaS offerings. Through the Orkiv website revamp, lead by myself, we were able to nearly double inbound marketing leads over a three month period. Education High school or equivalent Skills Git (2 years), HTML 5 (4 years), MySQL (1 year), Javascript (4 years), CSS3 (4 years), GraphQL (1 year), ReactJS (2 years), NodeJS (3 years), Web Development (4 years), Software Development (4 years), CSS Links https://www.github.com/kyle-villeneuve https://www.kylevilleneuve.com https://www.codepen.io/kylevilleneuve
