Manager, Information Services and Compliance Manager, Information Services and Compliance CHPSE, Manager of Information Services and HIPAA Compliance Milwaukee, WI Bilingual cyber security and IT management professional specializing in compliance, network administration, cloud migration and advanced data governance. A lifelong learner skilled in communication and aligning business demands with information technology capabilities. Skills include administering Azure, Office 365, and implementing security frameworks to ensure legal compliance without sacrificing efficiency. Certified HIPAA Privacy and Security Expert. Authorized to work in the US for any employer Work Experience Manager, Information Services and Compliance HealthChampion Partners, LLC - Milwaukee, WI June 2019 to Present Holding the dual role of supporting users and managing organizational security and compliance gives me a unique insight into how security practices affect efficiency. I leverage cloud automation and machine learning to implement security best practices with minimal hindrance on productivity. A life long learner, I understand that the state of cyber security is in constant flux and champion a model of continuous training and improvement for our multi-tiered defense posture. I led our company to become HIPAA compliant and I maintain compliance of networks, systems and people while serving as a consultant on legal requirements of vendor partnerships. I bridge the gaps between complex legal regulations, information technology capabilities and business needs to create a navigable and efficient compliance program.
