Front- End Developer Front-End Developer Front- End Developer - CPS Chicago, IL

Client-focused member with around 5 years of experience in Software Development Life Cycle (SDLC) pertaining to Analyzing, Designing, Coding, Debugging, and Execution for Web Application Interfaces.   Developed, Configured and Deployed Different Portals and UI applications using (HTML, CSS, JavaScript, JQuery, AJAX, Bootstrap, SQLite, and AngularJS).   Knowledge of Node.js and frameworks available for it such as Express.js.   Extensive Knowledge in CSS3 Styling Modules and Adobe Photoshop.   Expertise in using CSS pre-processors SASS/SCSS, Post CSS. Proficient in using Bootstrap 4/3 components skills like Grids, Toolbars, Panels, Combo-Box, Button and CSS Media Query to create Responsive Web Designs (RWD).   Profound in Document Object Model (DOM).   Knowledge on using Shadow DOM use to make custom element.   Proficient in making AJAX calls using jQuery and usage of JSON for faster and impulsive responses.   Proficient in using higher level style syntaxes, SASS for advanced CSS features.   Experience in AngularJS controllers, views and services for new website features.   Experience of using AngularJS as framework to create a Single Page Applications (SPA) which can bind data to specific views and synchronize data with server.   Extensive experience on working with various CSS/CSS3 features like CSS Background, CSS Layouts, CSS positioning, CSS text shadows, CSS box model, CSS table, Pseudo classes/elements and CSS behaviors.   Developer Toolbar, Used Karma-Jasmine for testing JavaScript code.   Sound Knowledge in package manager of NPM.   Working with Agile and Waterfall models throughout the project life cycle - using tools such as GIT for version control. Excellent interpersonal and communication skills, efficient time management and organization skills, ability to handle multiple tasks and work well in a team environment.   Research Oriented, motivated, proactive, self-starter with strong technical, analytical, and interpersonal skills. Authorized to work in the US for any employer Work Experience Front- End Developer CPS - Chicago, IL January 2018 to Present Responsibilities: Nearly worked with business system analyst to comprehend the necessities to ensure that correct arrangement of UI modules been built. Composed application level code to perform client-side validation utilizing JQUERY and JavaScript.   Planned the front- end applications, client intelligent (UI) site pages utilizing web advancements

like HTML5, CSS.   Utilized AngularJS framework to bind AngularJS template(views) to JavaScript object models   Used HTML5 and AngularJS to format the input forms and handled the input validations.   Built factories to utilize AngularJS services such as $http and $resource to consume the Restful APIs for data parsing from based backend server.   Developed AngularJS Directives to extend the grammar of the web through reusable HTML elements, attributes, and classes. Extensively worked on Bootstrapping for grid and Kendo spreadsheet with AngularJS.   Developed AngularJS Filters to manipulate text within HTML views and Developed AngularJS services for reusable functionality.   Designed responsive webpage using Bootstrap grid system to layout contents that fit different devices including mobile, tablet and desktop.   Developed CSS media queries to make the application responsive website design (RWD).   Worked on the optimization of the CSS files using CSS preprocessors SASS.   Created custom-directives and custom-filters for data manipulations (DOM) and to display data in company standard format in UI.   Worked with Adaptive web-designing and developing CSS Media Queries to make the application compatible with iPad (Landscape and Portrait) and PC.   Involved in writing application level code to interact with APIs, Web Services using AJAX, JSON.   Developed a real-time collaborative module in node.js that enabled users to create real-time block diagrams.   Developed HTML prototypes and UI deliverables, such as wireframes, screen mock-ups, and interface design.   Debugging the UI related defects for better UI experiences using chrome developer tools.   Used JIRA dashboard for tracking progress of the work updated the status of the issues.   Involved in Agile Software Development Team using SCRUM, TDD Test Driven Development   Environment: HTML5, CSS3, JavaScript, Adobe Photoshop, Angular.js, Node.js, AJAX, DOM, JSON, TDD, MongoDB, GIT, Windows. Front- End Developer Cross Country Mortgage - Cleveland, OH October 2016 to December 2017 Responsibilities: Gathered and analyzed the requirements and converted them into User Requirement Specifications and Functional Requirement Specifications for the designers and developers to understand them as per their perspective.   Used Angular.js as a framework to create Single Page Application (SPA) to improve page performance, which can bind data to specific views.   Created custom directives in Angular JS for re-usable components (multi-field form

elements, background file uploads). Leveraged Angular resources for all data access, encapsulating URLs and standardizing data access interfaces. Used filters while coding in Angular JS. Used JQUERY, JSON, AJAX and DOM scripting to create interactive web applications like message posting and auto complete form validations. Created dynamic webpages making AJAX Calls, using the XML Http Request Object. Called the restful web service calls for POST, PUT, DELETE and GET methods. Used Angular.js for building web-apps and is highly efficient in integrating with Restful services. Used JavaScript DOM manipulation and JavaScript event to generate the data result in UI. Setup Jasmine for UNIT and Functional Testing of JavaScript. Using Web Developer, Firebug, and IE developer toolbar for troubleshooting and browser compatibility. Composing with improvement group, QA group, Scrum expert, Product Owner and Senior administration to refine requirements and address issues. Debugging the UI related defects for better UI experiences using chrome developer tools. Used JIRA dashboard for tracking progress of the work updated the status of the issues. Involved in Agile Software Development Team using SCRUM, TDD Test Driven Development Co-ordinate with QA for testing, Production releases, Application deployment and integration. Environment: HTML5, CSS3, JavaScript, Angular.js, Node.js, AJAX, DOM, JSON, TDD, Oracle, Windows, Chrome Developer Tools, GIT, SASS. Web Developer Intern Infocision - Akron, OH September 2016 to October 2016 Responsibilities: Involved in fixing bugs in existing components and making them uniform in all browsers. Using HTML5, CSS3, JavaScript and jQuery implement Look and feel of various components. Developed a secured Login Authentication using AngularJS Regular Expressions, Express-Session, JSON Web Tokens. Built the reusable service components using Angular JS services with Object Oriented JavaScript, HTML5, CSS3 based on the visual designs. Used $http with AngularJS interceptors to make sure the requests were valid and used ui-router to handle nested views and avoid page redirection. Effective use of CSS3 features, such as creating multiple column, borders and background, etc. and used SASS Preprocessor. Used tools like Grunt, Gulp and Webpack as task runners and orchestrators for the build process. Used NodeJS to run Grunt tasks and build properly the project. Implement modules into Node JS to integrate

with designs and requirements.   Environment: HTML5, CSS3, JavaScript, Angular.js, Node.js, AJAX, DOM, JSON, TDD, Windows, Chrome Developer Tools, GIT. Front- End Developer Brickcys - IN June 2014 to August 2015 India   Responsibilities: Designing webpages and process upon client approval build out of all user-defined designs, UI components, etc.   Optimizing and created dynamic websites and applications interfaces using HTML and CSS.   Designed and Developed JavaScript, which is wrapper on top of jQuery and AJAX, based UI framework for UI Configuration widgets.   Communicated with back- end developers, system engineers and web designers to receive data needed for development.   Responsible for the design of web applications right from the conceptualization stage to its implementation and maintenance.   Writing application level code to interact with the backend databases using SQL.   Mentored co-workers increasing the efficiency and technical know-how of the entire technology team.   Extensively worked in defect maintenance of Front End issues.   Follow up with the development team on the improvements, integration and further enhancements in the website.   Environment: HTML5, CSS3, JavaScript, jQuery, SQL, Windows, Chrome Developer Tools, GIT. Education Bachelor's Additional Information Skills Client-Side Technologies: HTML5, CSS3, JavaScript, JSON, AJAX, ECMAScript 6 Libraries/Frameworks: jQuery, Bootstrap, Angular.js, Node.js, Express.js, CSS(SASS)   Version Controls: Git Database: SQL (Relational Database), NOSQL Web Concepts: Responsive Web Design, Single Page Application, Cross-Browser compatibility, Multi-Browser Support   Web Services: JSON IDE: Atom, Visual Studio Code 2018
