Full-Stack Developer Full-Stack Developer Web Developer / React / HTML / CSS / Javascript / Front End Utah County, UT Ever since I was in kindergarten I knew I wanted to be President of Toys R Us. Since that is no longer an option, I decided to become an entrepreneur. I have been thinking of business ideas and tech solutions ever since I thought of my childhood dream. In order to make my dream possible I have since then taken the initiative to educate myself in Web Development. I now have the skills needed to take initiative and build out my own ideas.   I can now build full-stack web sites that use databases, React frameworks, JavaScript, CSS, and HTML.   GitHub: https://github.com/Race428   Portfolio: https://acheson.co Authorized to work in the US for any employer Work Experience Full-Stack Developer SELF-EMPLOYED/UNEMPLOYED - Provo, UT June 2019 to Present Technologies Used: React, Redux, HTML, CSS, Node, Express, PostgreSQL, Sessions , Heroku DB, JavaScript, APIs   Created website for Social Media Content producers. Used authentication for security and redux to keep track of podcasts posted by admins. Implemented dynamic RESTFUL API calls to database to retrieve video links and render them in iFrames. Future plans to add forums, chat, and front- end manipulation to moderate content.

Full-Stack Developer SELF-EMPLOYED/UNEMPLOYED - Provo, UT February 2019 to Present Technologies Used: React, Redux, HTML, CSS, Node, Express, PostgreSQL, Sessions, AWS S3, Heroku DB   Implemented RESTFUI API's, NPM packages, and AWS S3 buckets to make a functional full-stack application for dating. Used React, Javascript and JSX to build both back and front end. Managed state through Redux, and used SQL database files in React to manage data flow. Used the Socket.io to implement a successful chat feature that saves all conversations to the database.   www.Tenderconnections.net Front End Developer DevMountain Student Developers - Lehi, UT March 2019 to June 2019 Technologies Used: React, Redux, HTML, CSS, SASS, Node, Express, PostgreSQL, Sessions, AWS S3, Heroku DB   Implemented a Webcam API to take a video blob and upload it to AWS S3 to view at a later time. Used conditional rendering of JSX to hide components and blocks of code until needed. Worked in an agile environment with daily stand ups to track progress of development.   PitchVivid is an application that allows hiring managers to view 30 second videos provided by potential applicants. Hiring managers can add, edit, or delete

jobs. All applicants for each posting are viewable with their videos and resumes if they uploaded one.   www.Pitchvivid.com Life Coach Daniels Academy - Heber, UT February 2018 to February 2019 -Worked with youth on the autism spectrum -Troubleshooted and provided solutions to problems clients had with other clients. - Communicated with an ex-google executive and current Microsoft Executive about their child's progress. - Used digital communication to keep contact with other staff -Managed Data entry for personal client progress via google products and windows OS.
