swipe once to login to current session anywhere ? Systems Center Configuration Manager SCCM ? Active Directory: System Administration and Managing users, Groups, roles and access permission ? Microsoft Office   Virtual desktops and apps ? Specialized Lab Equipment ? Network, Printers, Scanners   Recommendation letter: found her extremely technical and able to perform all the responsibilities that were required, she is a joy to work with.   My first encounter with Claudia was first of this year where she helped on a contract position for Bank of the Cascades. She fully took over a branch and was fully in charge of setting up the entire place with all of Bank of the Cascades hardware. Everything, but not limited, to teller computers and hardware parts to printers and fax machines. She took on this project and worked independently and was able to complete this in the time that was expected. I got feedback from the managers and directors there at the Bank of the Cascades, that she was a solid person. Not only was she technically knowledgeable, but she was a great communicator and worked well with the Bank ambassadors that was there on-site while she was working. She is a hard worker and passionate about what she does.   My second contract that I hired Claudia for was a deployment of thin clients ma- chines. She was in charge of a very large environment and was one amongst a team of 8. Again Claudia didn't shy away from taking over a task and getting things done. She had no problem working within the medical IT field and worked really well with the team. I received feedback from the managers there on site and they said that Claudia was excellent. She is through and detailed and neat in her work. She likes perfection and does things right the first time. They said that she got along with everyone and enjoyed her positive attitude and personality that she brought to the team.   Claudia has been a great contractor. She is dedicated and has a great work ethic. She would be a great asset to your company. Please feel free to reach out with any ques- tions or if you need more information. Thanks! Brenda Miller TEKSystems Recruiter Systems Administrator Office 365, Exchange, Backups, Spam Filters and ConnectWise Software for Windows Serves, VMWare, Office 365, Exchange, Backups, Spam Filters and ConnectWise Software.   At Oregon State Legislature I was the Windows Servers Administrator and Admin for Office 365. We used Track-it ticket system. For the UNISYS Corporation I was the pre-sales and software engineer for every enterprise level

UNISYS and ORACLE network in Northern Colombia. I sold, installed and supported systems in factories, banks, enterprise, military and government agencies, using the entire UNISYS and ORACLE line of hardware and software.   I am a Windows Server Administrator. Also UNIX Administrator.   I provide ORACLE software and hardware installation, upgrades and troubleshooting.   I have been in charge of deploying new software products through demos, presentations and benchmarks to the local customer communities. I was a customer Internal/External trainer of Unix topics.
