Sr. UI Developer Sr. UI Developer Sr. UI Developer - Preston-Hunter, Inc Taylor, TX * Around 10 years of extensive experience as a Senior UI Developer in all phase of SDLC like Requirement Analysis, Implementation and Maintenance. * Good understanding of Mongo DB and Proficient knowledge on Java Script. * Solid experience with Responsive Web Design (RWD) using Bootstrap and Media Queries. * Strong working experience in evaluate current applications and recommend processes to move applications into Angular6 - cli and Angular6 with backend services. * Expert in Angular6, worked on Angular6 features like Two Way Binding, Custom Directives, Controllers, Filters, Services and Project Architecture, React JS features like Components, Lifecycle methods, and unidirectional data flow using the Flux Architecture. * Experience in developing web applications using MVC architecture. * Expert in developing web applications using JavaScript, JSP, HTML/DHTML, DOM, XHTML, jQuery, CSS, and Ajax, & IDE tools like Visual Studio, Notepad++. * Expertise in developing front-end systems with JavaScript, Bootstrap, HTML5, CSS3, MVC frameworks such as Angular6, Backbone JS as a platform for Web applications. * Good Knowledge of JavaScript frameworks jQuery. * Extensive Knowledge in developing single-page applications (SPAs) using various JavaScript frameworks like backbone.js, underscore.js and bootstrap. * Experience with Firebug for Mozilla and IE Developer Toolbar for Internet Explorer. * Strong Experience with Object Oriented Concepts, Object Oriented JavaScript, Object Oriented Design and Implementation. * Strong experience in writing and updating the technical documents on daily basis with the changes made to the existing environment on daily basis. * Excellent interpersonal abilities, communication skills, time management and Team skills with an intention to work hard to attain project deadlines under stressful environments. * Highly Curious about new front-end development technologies and adept at promptly and thoroughly mastering them with a keen awareness of new industry developments and the evolution of programming solutions. * Worked closely with the project management and marketing team to completely define specifications to help ensure project acceptance. * Proven track record demonstrating innovative and unique designing skills, computer proficiency, ability to work in a stressful environment with projects and interaction with every team member. * Involved in Understanding functional

specifications and developing creative solutions to meet business requirements. Authorized to work in the US for any employer Work Experience Sr. UI Developer Preston-Hunter, Inc - Taylor, TX June 2017 to Present Responsibilities: * Involved in designing and developing enhancements per business requirements with respect to back end java beans development and front end JSP development using Struts. * Migrated the SQL Server stored procedures to Hibernate. * Developed user interface and custom renderers using JSF and My Faces. * Developed the business layer logic and implemented EJBs Session beans. * Involved in all stages of testing including authentication testing of user in both backend and front end. * Used SQL to perform Back-End data base testing. Used PL/SQL to create and manage test data on Oracle database. * Developed Graphical User Interfaces using struts, tiles and JavaScript. Used JSP, JavaScript and JDBC to create web Servlets. * Integrated Test Automation Framework using QTP, which enhanced the usability of automation scripts, generated for regression testing. * Assisted in conducting UAT and provided production support during the install of the application.   * Handling dependencies using spring configurations and used JPA and Hibernate as the persistent side frameworks. * Used Angular6 to create more interactive front-End Development. * Used ng-Grid, native UI Bootstrap for creating dynamic user interface using Angular Js. Designed user interface layout using CSS 3, HTML 5. * Understanding the customer requirements, mapping them to functional requirements and creating requirement Specifications. * Involved in documentation, review, analysis and fixed postproduction issues. * Maintained the Production and the Test systems.   Environment: HTML5, CSS3, JavaScript, Angular6, jQuery, Node JS, REST, Nemo-testing, Jenkins, XML, AJAX, JSON, Mac, WCAG2, Git & Git Hub, Photoshop, IE, Chrome, Mozilla Firefox, Web Storm, Atom. Sr. UI Developer LUXOFT USA INC - Houston, TX August 2014 to May 2017 Responsibilities: * Experienced in all phases of Software Development Life Cycle (SDLC)-Project Analysis, Requirements, Design, Development, Testing, Documentation and Deployment and also in Windows Client Environment in Agile Methodology. * Developed Web Application front end using ASP.NET, C#, HTML5, CSS3, JavaScript, jQuery, Angular.JS. Also, Migrated the existing JQuery based web application to Angular.JS. * Worked extensively on Angular.JS, Knockout.JS for multiple

web applications on client side. * Fixed bugs and problems for design, CSS, HTML, XHTML, and JavaScript. * Utilized XAML, WCF, SOAP, WPF based Event Handlers. * Developed and designed several pages in MVC4 with razor. * Implemented new designs, porting and styling legacy pages, integrating JQuery plugins, converting static forms into Ajax overlays. * Optimizing SQL queries and stored procedures. * Worked in all phases of SDLC, including requirements analysis, design and development, debugging supporting QA teams and debugging production issues * Maintained existing UI Applications and upgraded them using CSS, jQuery, AJAX, JavaScript, JSON and Backbone.js. * Wrote application level code to perform client side validation using JavaScript/jQuery * Worked with business system analyst to understand the requirements to ensure that right set of UI modules have been built. * Wrote application level code to perform client side validation using jQuery and JavaScript. * Wrote jQuery functions while implementing various UI Screens across the whole web application (both consumer facing as well as internal application). * Streamlined the Responsive Web Design to enhance the User Experience and developed designs for the prototypes for the Mobile UI * Involved in Requirement gathering, Functional and technical specification. * Coding and debugging using ASP.NET and C#. NET. * Used CSS for achieving consistent look and feel of the application. * Developed Web forms using ASP.NET server controls and validated input using Java Script. * Implemented reporting using Crystal Reports. * Writing Database routines, stored procedures and fixing up standard specifications. * Unit tested the application and fixing the defects raised by the QA team. * Worked on consuming JSON object creation, parsing on both clients as well as server side * Performed website optimization and faster page loading using CSS sprites * Worked on debugging JavaScript and HTML code with Firefox Firebug and Google chrome JavaScript debugger * Created images, logos and icons that are used across the web pages using Adobe Photoshop * Developed test-driven Development(TDD) Strategy guiding use of the Nunit unit testing framework. * Implemented Presentation layer using CSS Framework, knockout JS, Wire-framing, HTML5. * Used jQuery core library functions for the logical implementation part at client side for all the applications. * Designed and implemented Data Access layer-using ADO.NET to connect and retrieve or manipulate database information.   Environment: Asp.Net, .Net

Framework 4.5/4.0, Share Point, Css3, Angular Js, Rest Api, Wpf, Soap, Html5, Java Script, Ado.Net, Xml, Xaml, Ajax, Sql Server 2012, Visual Studio 2012, Linq, Mvc4, Smtp Server, Crystal Reports, Telerik, Jquery. UI Developer Thales Avionics - Arlington, VA February 2012 to July 2014 Responsibilities: * Developed the front end using HTML5, JavaScript, AJAX, CSS3, Bootstrap. * Extensively used HTML&CSS to obtain the desired UI. * Good working experience in writing Angular Js/JQUERY AJAX based web Applications to improve the response time and extensively implemented update panels, script manager * Used front end web development tools HTML5, CSS3, JavaScript, to design UI * Worked on the application as Node.js developer to build different REST APIs for modules such as user, products, and checkout. * Used Rxjs in Angular2 to make the HTTP requests to the REST API for getting the user details. * Used Angular Js multiple in-built directives such as filters, root scope, scope, modal, template, state etc. * Excellent implementation knowledge of Distributed Web Services/ Enterprise / Web / Client- Server systems using Java SOA Web services, ESB. * New library development with micro services architecture using Rest APIs, spring boot and pivotal cloud fundry. * Hands on experience TDD (Test Driven Development) approach by using testing tools such as Jasmine, Karma. * Conducted extensive functionality testing by using Jasmine and Karma. * Installed, monitored and supported Web and Application Servers on Solaris and Linux environments. * System Administrator/Integrator role in a large team responsible for maintaining of Linux operating systems. * Experience in working on Nemo-Testing (selenium-based web Driver) to test web applications. * Developed backend web services using Node JS and stored dependencies using NPM. * Hands on Experience on Angular 2 technology for one complete project in rebasing the UI of the Application using the techniques in Angular 2. * Used Github Extensively to Pull, Push and Merge Code and solved various merge conflicts. * Responsible for developing and maintaining web application, using Node JS. * Good understanding knowledge on agile methodology. * Worked with services to make AJAX calls to fetch the data and injected promises to avoid call-back hell and succeeded in executing the code asynchronously. * Conducted unit testing with Firebug, IE Tester and end-to-end testing of the supported browsers and devices. Environment: Java, JEE (JPA, JSP, Servlets, EJBs, JMS, JSF, annotations, JDBC),

Hibernate, HTML/CSS/JavaScript/JSON, UI frameworks & libraries (Struts, SpringMVC, jQuery, Bootstrap, MVC concepts, Web Services (SOAP/REST), WebSphere, Oracle 11g, SQL, IDE (Eclipse/RAD), XML, Configuration Management (Clear Case, Clear Quest), Angular Js. UI/ Web Developer PNC Financial Group - Bowling Green, OH October 2010 to January 2012 Responsibilities: * Applications developed using JavaScript, Angular v1.6. * Used NPM for installing required node modules and other published Angular NPM modules. * Implemented UI design using angular materials, HTML, JavaScript, Bootstrap JSON and CSS3 for the web Admin Panel. * Created typescript reusable components and services to consume REST API?S using component-based architecture using Angular v1.6. * Developed dynamic responsive Web Application by integrating Angular v1.6 with Bootstrap which is further integrated with Web Services. * Used Angular v1.6 and Angular materials as the front-end framework, with CSS3, and HTML5 as the main programming languages. * Created reusable components and services to consume REST API's using Component based architecture provided by Angular. * Responsible for the overall layout design that meet cross-device compatibility using Bootstrap, color scheme of the web site using HTML5, and CSS3. * Used JavaScript as basic scripting language for coding, Adobe Dreamweaver as IDE and bower to install Angular Js packages. * Created various Web Forms & User Interface Screens using Angular Js and JavaScript. * Experience developing web pages using Angular Js Framework and familiar with various Angular Js directives and services. * Involved in running Selenium automation scripts and updating the scripts according to enhanced requirements using selenium WebDriver. * Participated QA weekly meetings and various other meetings and discussed Enhancement and Modification Request issues and defects in the application. Environment: C#, SQL, Agile, SQL Server, PHP, Git Hub, Microsoft Visual Studio, Xamarin, MySQL Workbench. UI Developer Maganti IT Solutions - IN April 2009 to September 2010 Responsibilities: * Developing, enhancing and supporting new and existing Java/J2EE applications. * Involved in developing HTML and JavaScript for client-side presentation and, data validation on the client side with in the forms. * Involved in developing the UI pages using HTML, DHTML, CSS, JavaScript, JSON, JQuery and Ajax. * Implemented design patterns like singleton, DAO of CORE JAVA in developing applications.

* Designed and developed JSP Pages using Struts Frame work and Tag libraries. * Created Hibernate configuration files, Struts Application context file. * Involved in developing Action Servlets classes and Action classes. * Designed and developed various modules of the application with frameworks like Spring MVC, Web Flow, architecture and Spring Bean Factory using IOC, AOP concepts. * Developed different JQUERY component in MVC micro architecture framework which internally use various design pattern such as singleton, command, delegate, etc * Used Cascading Style Sheets (CSS) to maintain design consistency across all web forms. * Migrated legacy J2EE alert services to a Spring-Hibernate based application. * Design and Coding of User Interfaces using JSP, AJAX, JavaScript, CSS and HTML. * Extensively used Hibernate in data access layer to access and update information in the database. * Involved in using Apache Tomcat Server for deploying and testing the code. * Create MySQL procedures and fine tune database queries. * Involved in implementing Spring MVC Framework * Implemented design patterns like Singleton, Factory, Template and DAO. * Communicate with Business Users and facilitate them with required data. Environment: J2EE, Spring, Hibernate, JSP, Apache Axis, Web Services Explorer, HTML, CSS, Ajax, Jquery, JSTL, JavaScript, JBoss, Eclipse, Oracle. Education Bachelor's
