IT Manager IT Manager IT Manager - American Foundry Group Bixby, OK Passionate technologist with experience in leading IT to encourage change and growth. I enjoy motivating and inspiring those around me to experience technology in a way that improves day to day experiences. Through my experience and industry contacts I manage a clear in-depth understanding of emerging technologies so as to stay current and relevant as the business needs new innovation. I find it key to have a clear strategy and mission when approaching the IT business unit just as is necessary for all aspects of a company. I treat IT not as projects or tasks but as ongoing programs and systems; always push, challenge, and change because the moment you fail to innovate you fail to improve and if you fail to improve, you fail.   Certified RFID Associate from RFID Professional Institute Delivers clear, concise, and modern strategies for continued growth   Embrace, encourage, and lead changes that benefits others personally and professionally   Communicates well through written and verbal communication   Ability to create IT solutions for business needs and process challenges   Displays ongoing growth of knowledge to continue to adapt to the changing technological landscape Authorized to work in the US for any employer Work Experience IT Manager American Foundry Group - Bixby, OK January 2008 to Present   Design, maintain, improve infrastructure for machines, computers, network, and communication   Oversee, review, and audit IT security software, hardware, and test those technologies to ensure latest threats are prevented Manage, lead, and train IT staff including power user teams to augment IT support without IT budget impact   Create business innovation opportunities through new leading technologies such as Hybrid Cloud, Hyperconvergence, VDI, IoT, RFID, and constantly reviewing emerging applicable technologies   Member of SFSA (Steel Founders' Society of America) IoT Committee   Manage multiple vendor and IT service provider relationships, maintain SLA's, annually stayed under budget   Implement, design, and continual improvement of business processes, workflows, and ERP Design SharePoint and Teams Sites for internal and external collaboration Network Administrator The Price Companies - Monticello, AR September 2005 to January 2008   Implemented and maintained WAN for 24 locations worldwide   Managed helpdesk operations   Implemented ERP solution in multi-location multi database environment   Migrated from legacy to virtualized
