Neal Lott, retired, National Centers for Environmental Information (formerly National Climatic Data Center)   Chief, Data Access and Applications Branch (DAAB), 2002-2014. 828-243-2609.   General Statement: As a contract employee, Fred Smith was responsible for software development, software maintenance, and data processing for approximately 14 years during my time with DAAB.   ? Attitude: Always positive and provided a very good   influence on employees around him.   ? Professionalism: Very professional in understanding and grasping requirements, responding to changes, and being responsive to supervision; but not requiring close management in completing tasks.   ? Abilities: Able to handle very complex software development tasks, often requiring innovative thinking.   ? Software testing and evaluation: Very thorough in using computer-based solutions to develop and complete

baseline testing to ensure software development and changes meet all requirements.   ? Documentation: Excellent in all aspects of program and system documentation, to provide change-tracking, etc.   ? Data processing: Managed day-to-day data processing of a large, global climate/weather-observational data set;   which often required overcoming problems due to data-stream changes, hardware issues, etc.   ? Assisting others as needs arise: Very willing to assist others in the Branch as issues arose, such as assistance in software tasks, unix/linux scripts, etc.
