Sailpoint IAM Developer Sailpoint IAM Developer Sailpoint IAM Developer - Oregon Portland, OR

Experience in Testing, Design, Analysis, Development, Implementation and Configuration Specializing in SailPoint Identity and Access Management   Experience in building custom workflows, rules, policy, provisioning in IAM.   Experience in building quick links and Creating Custom Forms.   Extensive knowledge in Design, Development, Deployment and Support of IIQ. Worked on SailPoint IdentityIQ product with a good deal of experience in Access Management, Workflow, LCM, Certification, Rules, and Policy.   Experience in designing, installing and upgrading identity and access management applications.   Worked on upgrading Sailpoint Versions 6.4, 7.0, 7.1, 7.2 and worked on Patching 6.4, 7.0, 7.1 Versions.   Experienced in working on Authoritative and Non-Authoritative Applications Configuration using Active Directory, LDAP, Flat file, JDBC, Oracle Database Direct and Sales force, Web Services connectors.   Experience in designing and deploying Identity and Access Management Solution to improve user experience and meet compliance.   Experience in Software Development Life Cycle Entailing Requirement analysis, design, development, testing and trouble shooting.   Very good experience in different types of connectors like Delimited File, JDBC, LDAP, AD and custom connectors according to client requirements   Experience in designing, installing and upgrading identity and access management applications.   Strong understanding of internal technical of Sailpoint IIQ, Role Based Access Control (RBAC), Governance and Access Certification in Sailpoint.   Great experience in administration of User and Role Provisioning, Connectors, Workflow, Certificate Management, Session Management, Encryption technologies and directories like LDAP, MS Active Directory Involved in participating in self-code review, client code review, and making and writing proper documentation as per client request.   Drafted use cases and functional requirement specifications for migration from existing OIM system to Sailpoint IIQ framework.   A good communicator and team player with excellent inter-personal skills.   Authentication and Authorization as well as Custom-built Security and Technology Frameworks.   A quick learner with the ability to make solutions-oriented, creative and innovative contributions in highly demanding situations.   Great experience in User Management, Password Management, Account Management, Entitlement

Management, Role Management, Web Access Management, Directory Services. Ability to work independently as well as in a team with a great deal of zeal to learn new technologies and techniques. Experience of creating custom email templates, configuring target applications. Work Experience Sailpoint IAM Developer Oregon - Portland, OR September 2017 to Present Responsibilities: Experience in SailPoint IdentityIQ and integration of IdentityIQ with LDAP, AD, Logical, JDBC and delimited file applications Developed application provisioning policy forms that would take managers input on access request and propagate the information to the ServiceNow ticket using IdentityIQ ServiceNow integration module Worked on role definitions and role based birthright provisioning Created custom workflows for contractor extensions and employee provisioning Developed and configured lifecycle events for user transfer, user termininate and native change detection Developed rules in beanshell - Application rules, identity trigger rules, aggregation rules, connector rules, ceritification rules and policy rules Designed and developed policies aroundSOD, activity and advanced business rules Configured logical applications and managed entitlements with custom rules Worked on custom tasks for aggregation threshold check to manage JDBC application account aggregations Configured event based and continuous certifications for manager and application owner review Experience integrating IIQ with ITSM tools like ServiceNow and Remedy Developed custom rules for certifications like Exclusion rules, sign-off approver rules, delegation rules period enter rules Worked on logical applications with complex account matching rules Managed service accounts and developed rules around maintaining service accounts in IIQ Create standalone rules for data cleanup and data manipulation activities SailPoint IAM Developer Western Alliance Bank - Phoenix, AZ November 2015 to August 2017 Responsibilities: Experience on Design, Development, Implement, and educate on SailPoint build processes including code migration, Installing and configuring across multiple cross platform Perform Integration and hands on experience with multiple applications using Java such as AD, Exchange, RDBMS, Flat File LDAP and Service now. Developing custom Tasks and Task Executors and providing solutions for the changing business requirements. Customizing Out of the box workflows. Gathered requirement from clients and used that

requirements to implement roles in SailPoint. Hands on working with client post implementation for user testing, debugging, support, and maintenance.   Experience on building propelled services to be incorporated on the IIQ Dashboard to give custom elements to the end-users.   Worked on the tasks like approval workflows, customizing on boarding workflows, Job change workflows.   Experience on Build Map rules Pre-Iterate rules and Customization rules.   Customize the User Access request portal, Self-service Request, OOTB quick links and populations.   Responsible for publishing requirements, installation, architecture, run-book, specifications and configuration documentation.   Performed unit testing and involved in bug fixing of the applications and actively involved in production related issues. IAM Developer ATOS - Dallas, TX May 2013 to September 2015 Responsibilities: Releasing the Builds to QA Team in a phase wise manner.   Application on boarding and Implementation of applications and identities.   Handling Joiners, movers, leaver's process for high risk business areas by provisioning, de-provisioning and amending accesses within 24 hours SLA.   Perform Installation and configuration of SailPoint IdentityIQ   Developed custom workflows and rules as per business requirement.   Involved in Configuration and development of Sailpoint Life Cycle Events (LCM)   Designed Custom tasks, Custom Reports to cater client needs in IIQ (SailPoint).   Creation of manual identities in Sailpoint IIQ for temporary/contract staffs. Create identity Life Cycle workflows, defining life cycle events.   Implementing End user Access Request.   Setup applications Active Directory, LDAP, Oracle and Flat Files.   Implemented and Customized Manage Access and Manage Identity modules as per customer requirements in SailPoint IIQ.   Developed custom reports with client specific requirements to attain their Revocation and Audit Report.   Interacting with the clients for requirements.   On boarded Delimited file applications, LDAP, UNIX and ESS applications.   Customizing and branding of SailPoint.   Communicating with the development team and Implementation of Password management of SailPoint IIQ   Developed Service Now Custom Connector with SailPoint which tracks the ticketing system in Service Now and returning ticket status to SailPoint   Experience with Java server side and enterprise applications using JSF, Servlets, Web logic Application Server, JBoss, XML.   Developed the rules like build map, correlation and manager correlation rules.   Group configuration for provisioning, certification

and Remediation requests Software Developer Wells Fargo - Charlotte, NC February 2012 to March 2013 Responsibilities   Worked extensively using WebSphere Studio Application Developer Developed XML's as part of Web Enrollment application. These XML's were used as data feed for another web application.   Designing and coding the UI Framework using Struts (JSP/Servlet) and business logic   Application on boarding and Implementation of applications and identities. Implementation Password management of SailPoint IIQ.   Created Stored Procedures, Functions and Triggers.   Extensively used design patterns like Singleton, Factory, Abstract Factory etc. Involved in Analyzing, Designing and Implementing all of the Business User Requirements Developed Maven build scripts and involved in deploying the application on Eclipse IDE. Developed Oracle SQL and PL/SQL procedures, queries, functions and packages for various database operations   Developing Build scripts using ANT for packaging and deploying the application   The business logic is developed using J2EE framework and deployed components on Application server where Eclipse was used for component building.   Responsible for developing and deploying web components on WebSphere Application Server   Implemented logging using log4j and developed robust exception handling and error reporting mechanism.   Implemented Web Services using SOAP protocol, UDDI, WSDL and Service Oriented Architecture (SOA) Concept. Involved in the development of design and security documentation for SailPoint IIQ components. Extensively involved in Unit testing and coordinated with the testing team and fixing Bugs at various stages of the application development.   Worked on bug fixing and enhancements of change request. Education Bachelor's Skills Java (4 years), JSF (2 years), LDAP (6 years), Oracle (3 years), XML. (2 years) Certifications/Licenses Driver's License
