Database Administrator Database Administrator Database Administrator CSC Bowie, MD Work Experience Database Administrator CSC - Lanham, MD November 2011 to Present   Responsible for the performance, integrity, backup and security of Oracle and Greenplum databases, while developing packages for deployment.   Installation, configuration and setup of Greenplum environment and database   Planning, installation, configuration, management and troubleshooting of Oracle 10g and 11g databases on Windows, Solaris and Linux.   Administer database user accounts. Create, modify and deactivate user accounts; assign and monitor user access rights   Managed Stored Procedures, Functions, Triggers, Packages and views used by the database instance.   Duplicate databases via RMAN from on environment to another either with a live data copy or restoring backups from tape   Implementing bug fixes and patches for the listener on 10g and 11g on linux and unix servers to include quarterly Oracle upgrade patches (PSU, CPU) across a numerous servers   Checking and verifying the successes of backups   Regular maintenance and implementation of database partitions and indexes   Upgrade test and development environments from 10g to 11g   Provide network troubleshooting and administrative support for the development staff.   Document Database structure, changes, problems, issues for future reference. Analyst NinthBall LLC December 2010 to Present   Research and information retrieval on web architectures and data modeling   Troubleshoot PC performance issues and recommend solutions   Designing and editing graphic, logos to aid with brand strategy for NinthBall's online content websites   Researching Open Source Content Management Systems (CMS) and their different applications to web-centric products   Being available for other assignments as required by employer.   Detailed research and implementation for increased blog traffic Oracle Database Administrator Boltos Solutions July 2010 to December 2010   Planning, installation, configuration, management and troubleshooting of Oracle 10g and 11g databases on Linux and Windows OS   Performed Oracle database Upgrade and Migration from Oracle to 10g to 11g   Performed database upgrade from 10201 to 10204   Installation and management of Oracle database using Grid and database control   Installation and application of several Oracle critical patches to various database versions   Monitor, optimize and allocate physical data storage for database systems.   Install and configure

relevant network components to ensure database access as well as database consistency and integrity   Establish, implement and maintain comprehensive Oracle database maintenance plans

 Developed, implemented and maintained an Enterprise Oracle backup, recovery and disaster recovery strategy.   Implemented the use of Oracle Recovery Manager (RMAN) to backup the databases   Performed import and export as needed and scheduled nightly export on each database   Perform various RMAN cold and hot backups.   Troubleshoot and resolve various Oracle problems such as connectivity problems, backup and performance issues.   Perform maintenance and related preventative maintenance on databases   Providing Oracle network troubleshooting, technical and administrative duties   Resolve complex database issues   Create and manage documentation on the configuration and support of the Oracle databases   Applied security features to 10g and 11g databases   Perform bulk load into the database using SQL Loader   Tune the database and applications for faster and better performance; also performing goal-oriented tuning as necessary.   Tune SQL queries and database performance for OLTP and DSS applications within various environments   Develop best practices based on associated security policies, industry security standards, and audit regulations to ensure devices are appropriately secured from security breaches Resolve compliance break-fix incidents based on vulnerability testing, audits, and/or associated security monitoring systems   Perform fine grain database auditing.   Schedule jobs using various Oracle tools such as Oracle OEM, DBMS JOBS and SCHEDULER   Maintained stored procedures, functions, triggers, packages and views used by the database instance   Documented database structure, changes, problems, issues for future reference   Develop and enforce database related policies, standards, naming conventions, operating procedures and best practices.   Develop a strategic plan for the database development that supports the organizations operational requirements.   Administer database user accounts. Create, modify and deactivate user accounts; assign and monitor user access rights Education Bachelor of Science in Telecommunications Morgan State University - Baltimore, MD August 2005 to May 2009 Skills Microsoft Windows (XP, Vista. 7) OS, Unix/Linux OS, Microsoft Office, SQL,Oracle 10g & 11g relational databases; PSQL/Greenplum database, Oracle Enterprise

Manager (OEM), Oracle Real Application Cluster (RAC), Data migration import and export, SecureCRT/FX, Rational Clearcase & ClearQuest, problem solving, strong communication skills, analytical thinking, quick study.
