Java Developer

Java Developer

Java Developer Irving, TX

? Full-stack developer with 3+ years of experience in Java/ J2EE applications/ Web Services and other web-based software development, testing and integration of projects, relational databases and Client-Server applications. ? Experience in Core Java concepts such as OOP concepts, Collections API, Exception Handling, I/0 system and Multi-Threading. ? Hands-on experience in advance Java and J2EE technologies like Servlets, JSP, JDBC, Hibernate, JPA, JMS and JTA. ? Extensive experience in developing server-side applications using Spring and Hibernate framework. ? Experience in building and deploying REST Web Services using JAX-RS (Apache CXF, Jersey) and Spring with REST API. ? Experience in developing and deploying SOAP Web Services and integrating SOAP clients. ? Experience in developing web application implementing MVC design pattern using Spring MVC and Apache Struts. ? Excellent work experience in SQL Server R2 2008, MySQL, PostgreSQL and Oracle 9.i. ? Hands-on experience in designing dynamic and responsive web pages using HTML5, CSS3, JavaScript, AJAX, JSON, and jQuery. ? Proficient in implementing Singleton, Prototype, Proxy, Decorator, Factory Design Pattern. ? Experience in writing SQL Queries, HQL Queries, Stored Procedures, PL/SQL Packages and Functions. ? Hands-on experience with unit, integration and system testing. Authorized to work in the US for any employer Work Experience Java Developer Techmind Solution - Kathmandu May 2014 to June 2017 Responsibilities: Developed full remittance web applications in Java (JDK 7 and JDK 8) using Spring and Hibernate framework, PostgreSQL, SQL Server 2008, MySQL, HTML5, CSS3, and JavaScript. Realized responsive web design and adaptive page layouts via jQuery, AJAX and Media Queries (CSS3). Reduced application's load and execution time and memory requirements by code refactoring, changing the data structure and tweaking the configuration of the Apache Tomcat server. Successfully collaborated with Third Party Banking and remittance software by building, deploying and integrating Web Services and clients in REST and SOAP frameworks. Improved forward compatibility of the older web applications by configuring the code to work with JDK 8 and Apache Tomcat 8. Generated unit and integration test cases for testing several modules in every iteration and conducted system testing to ensure the application's robustness. Enhanced the UI of

remittance Android app by updating the Android SDK from API level 17 to API level 21, also incorporating new android features. Debugged coding errors and resolved client's technical issues. Followed Agile software development using Scrum methodology. Collaborated with project manager and clients on ideas for improving the web applications. Education Master of Science in Computer Science in Computer Science Texas A&M University May 2019 Bachelor of Information Technology in Information Technology Purbanchal University 2015 Skills AJAX (3 years), Android (1 year), AWS (Less than 1 year), HTML5 (3 years), Java (3 years), JavaScript. (3 years), jQuery (3 years), MS SQL Server (3 years), MySQL (3 years), REST (3 years), SOAP (3 years), Tomcat (3 years), web services (2 years), Spring (3 years), Hibernate (3 years), JSON (3 years), Git, HTML 5, CSS Links https://www.linkedin.com/in/rujen-shrestha-3a9133119 https://github.com/rujenshrestha Additional Information TECHNICAL SKILLS: Languages Java, SQL, PL/SQL J2EE Technologies JDBC, Servlets, JSP, Struts, RMI, JTA, JPA Frameworks Spring, Spring Boot, Hibernate, JUnit Web Services REST (JAX-RS, Spring REST), SOAP (JAX-RPC, JAX-WS) Databases MySQL, Oracle, PostgreSQL, MS SQL Server Web Technologies HTML/HTML5, CSS3, JavaScript, jQuery, AJAX, JSON, XML, AWS Version Control System GIT, SVN Tools Maven, Ant, Apache Tomcat, Apache HTTP Server, XAMP, Postman, Wireshark IDEs Eclipse, IntelliJ IDEA, NetBeans, Atom, Android Studio, Microsoft Visual Studio Others Microservices, Log4j, Agile methodologies, Waterfall model
