Sr. Java/J2EE Developer Sr. Java/J2EE Developer Sr. Java/J2EE Developer - Att, NJ Jersey City, NJ   3 years of IT experience in Analysis, Design, Development, Coding, Implementation and Testing of web based and client server multi-tier applications using Java/J2EE technologies. Experience in designing highly transactional web sites using J2EE technologies and handling design/implementation.   Worked in Agile Scrum and Waterfall methodologies   Extensive experience on MVC architecture using Spring, Struts frameworks and J2EE Design Patterns Experience in XML technologies including XML, XSLT, XPath, XSD, JAXB, SAX and DOM parsers.   Experience in Integration and deployment of J2EE Applications on WebLogic, WebSphere, JBoss5.1 and Apache Web Server and Tomcat. Knowledge in AWS   Extensive experience on DB2, Oracle, SQL Server, Unix Shell Scripts, python, Ant build scripts, JSP, JSTL, Servlet, JDBC, JMS. Experience in developing WebServices using REST and SOAP   Worked with off shore development teams and worked in production support and resolving issues. Sponsorship required to work in the US Work Experience Sr. Java/J2EE Developer Att, NJ July 2015 to Present   Working as a Java Developer and involved in the requirement analysis, development, integration, deployment and testing.   Developed the application using Spring MVC framework, JSP, jQuery, AJAX. Used Spring and JDBC annotations.   Involved in using JDBC with Spring DAO for implementing business layer.   Extensively worked on developing test cases using JUnit   Used Eclipse to develop, debug and testing the application.   Used Angular JS 2 for developing application.   Hands on Experience in databases such as MYSQL, MongoDB(No Sql)   Experience in Agile Development using Scrum.   Worked on design and implementation for integrating applications using Service Oriented Architecture (SOA). Implemented Restful web services for communication.   Developed low level socket programming to communicate with in the servers. Implemented high volume processing data access layer using JDBC to interact with multiple databases (MYSQL and MANGO DB).   Developed Shell and Python Scripts to run the applications and transferring the files from one server to another server.   Deployed the application on Tomcat and involved in resolving deployment issues. Java Developer NPD Global, NY December 2014 to June 2015 Responsibilities: Involved in Business and functional requirements with business users.   Involved in Data Base

design and modeling, preparing Use Cases, Sequence Diagrams, Class diagrams etc. Used Spring framework like Spring IOC and Spring ORM for developing application. Used Hibernate to develop and maintain the persistence layer. Developed the application using Java Design patterns, Spring, Struts and EJB. Wrote XSL style-sheets and XSLT Java transformers for converting XML data into HTML and other XML formats. Developed Action classes, Action forms and configuration files in the Struts MVC framework. Front-end validation was done by using JavaScript. Developed helper classes, EJB Session Beans and Entity Beans for implementing Business Logic. Used Eclipse to develop, debug and testing the application. Developed Database utility classes to access Database using JDBC, SQL Developed Stored Procedures, Functions and Packages using SQL. Worked on WebSphere Administration and maintenance including clustering, nodes etc Developed Unit and Integration testing of the application using JUnit Framework to ensure Quality Assurance. Developed Shell and Phyton Scripts to run cron jobs and copy files into different servers at regular intervals. Developed Ant Scripts to build EAR files for the application. Environment: Java/J2EE, JSP, JMS, Struts, Spring 3, Hibernate, Servlets, JDBC, JUnit, WebSphere, SVN, HTML, Ant, MS Visio, JavaScript, XML, XSD, XSLT, Shell scripts, Phyton Scripts UML, Windows, Linux. Associate Developer ICICI December 2012 to July 2013 Responsibilities: Designed and Developed web interface for admin module using Struts MVC framework to Search, reset password, lock/unlock the user accounts. Extensively used Struts Validator for server-side validations and JavaScript for client-side validations. Developed Stored Procedures, Queries to extract the Customers data from the database. Used Subversion for Version Control Management. Extensively used the Struts tag libraries (Bean Tags, Logic Tags and HTML Tags etc.) and Custom tag libraries. Involved in code reviews, debugging and testing. Used connection pooling for optimization using JDBC interface. Flexibly used J2EE design patterns like Service locator, Data Access Object and Singleton. Prepared Use-Cases from the given requirements and also interacted with clients for requirements gathering and clarifications. Environment: Java, JSP, Struts Framework 1.2, JDBC, UML, JavaScript, HTML, Oracle 9i, WSAD, Maven, Subversion, Log4J, WebSphere and Windows / NT. Skills Ajax. (3 years), Ant (Less than 1

year), Design patterns (1 year), Eclipse (4 years), Ejb. (Less than 1 year), Html (1 year), J2ee (4 years), Java (4 years), Jdbc (4 years), Jms (Less than 1 year), Jsp (4 years), Junit (4 years), Linux. (Less than 1 year), Maven (Less than 1 year), Oracle (Less than 1 year), Sql (4 years), Struts (1 year), Subversion (1 year), Tomcat (3 years), Websphere (1 year) Additional Information TECHNICAL SKILLS Java/J2ee Technologies JDK(1.6,1.7), JSP, Servlets, EJB 3.0, Swing, JDBC, Java Beans, RMI, JSTL, JMS, JAXP, JAAS, LDAP, Java Mail, JAXB, Jersey, Struts Framework, Spring Framework, SOAP Design Patterns &Spring Boot.   Web/Persistence Technologies JSF, Flex, AJAX, Ext JS, DWR, A4J, JPA, Hibernate, Languages/Scripts Java, XML, XSLT, C, C++, Java Script, Angular JS 2, HTML, XML, DHTML, Shell script. Web/App Servers IBM Websphere 5/6.1, BEA Weblogic 6.0/7.0/9.0, JBOSS, Oracle AS, Tomcat 4.0/5.0/6.0/7.0/8.0, Apache 1.3/2.0, JBoss. RDBMS Oracle, MS SQL Server 7.0, DB2 and My SQL. Operating System UNIX, LINUX, AIX, Solaris, Windows 9x/NT/2000, and Sun Solaris. Tools/Frame Work MS Front Page, MS Office, Text Pad, Log4J, Ant, Maven, Gradle, JUnit, Win CVS, SVN.   Development Tools Eclipse, MyEclipse, NetBeans.
