Work Experience Front End Developer TECHNOMAX, LLC October 2015 to Present Project: Products presenting system Products presenting system is a project building platform to present the different products and services that company provide, it is a simple, lightweight, well organized website which is easy for

customers to browse every product they want, the specific information of products and services are also provided to client. Designing and coding the website front- end with Bootstrap and AngularJs with team member. Responsibilities: Created requirement analysis, design, coding using Javascript, jQuery, jQuery UI libraries, HTML5, CSS3 using Sublime editor. Systematic markup in semantic fashion for HTML5 that make use of advancedfeatures Designed and developed intranet web applications using Javascript andCSS. Manipulated data using MySQL database management system and handled database access and data transmission based on Restful web service. Implemented MVC pattern of AngularJS and Angular2 framework to developed Single Page Application(SPA). Applied responsive webpage that fits all users and devices from desktop to mobile phone using Bootstrap. Wrote AJAX call using jQuery syntax to get latest product information as JSON data files from server and output into webpages. Wrote application code to perform client side validation using jQuery andJavascript. Managed scripting packages with Bower installation and Grunt for task runner such as linting, compilation, unit testing, minification. Embedded objects such as videos on webpage that respond accordingly when sizes of browser alternate. Used version control tolls GIT and SVN. Conducted cross-browser testing in all browsers:IE8+, Firefox, Chrome, Safari and Opera. Used tools included IE tester, Firebugs, Web Developer and Chrome DevTools. Defined technical requirements based upon businessrequirements. Maintain, enhance and recommend solutions that best suit business and technology needs form UI standpoint. ENVIRONMENT: HTML5, CSS3, Javascript, jQuery, jQuery UI, Bootstrap, Angular JS, JSON, AJAX, SVN, GIT. Front- End Developer CHINA PETROLEUM & CHEMICAL CORPORATION - Puyang, CN January 2011 to December 2013 Project: Internal Management System I was responsible for developing the internal management of the company. The administrator can login his account and check the company's internal data such as the number of people who visited the webpage, how many people login and what is each day's revenue. Also the project can be used to manage the customer's information and products details. The system we designed makes company management more convenient. Responsibilities: Designed and implemented a web app for storing the information of customer, generating saving personal

contacts, payment information and handling schedule management. Built AngularJS framework including MVC architectures, different modules, specific controllers, templates, custom directives and custom filters. Applied multiple built-in Directives such as ng-model, ng-click into AngularJS application. Created custom Directives which contain restrict values (AECM), isolate scope, template, and link functions in order to display a list of items inside a grid. Deployed Bootstrap to apply responsive utilities and appropriate positioning of elements to the website. Use AJAX to retrieve customers' information as JSON data across Restful web service. Designed dynamic client-side JavaScript codes to build web forms and performed simulations for web application, page navigation and form validation. Worked on resolving numerous cross browser compatibility related to JavaScript and CSS, such as IE, Mozilla Firebox, Google Chrome and Safari. Implemented the product quote function in the product search section by using AngularJS, AJAX and JSON. Used version control tools Git to update the project with other team members. Work with back end developer to finish the account management process. Worked on documentation and involved in maintenance and support. ENVIRONMENT: HTML, CSS, JavaScript, AJAX, JSON, XML, Bootstrap, AngularJS Education Master of Science in Electrical Engineering Western Michigan University Additional Information TECHNICAL SKILLS: Web Technologies HTML/HTML5, CSS/ CSS3, JavaScript, jQuery, Bootstrap, SASS, LESS, AJAX, JSON, XML, Angular JS, Agile, Grunt, Bower, npm, UnderScore.JS, backbone Js, Node.JS, Node.JS, PHP Testing tools IE tester, Chrome Inspector, Firebug, Safari Web Inspector, Jasmine Version Control System tools SVN, GIT Debugging Tools Firebug, IEtester, Chrome Element Inspector IDE / Text Editors WebStorm, Sublime, Visual Studio, Eclipse, Notepad2++ Database Management System mySQL, Access
