Front End Developer Front End Developer Front End Developer - Deloitte Hermitage, TN   I have 6 Years of Extensive IT experience which includes the experience in designing User Interface (UI) applications   A professional experience in the software development life cycle phases including analysis of requirements, Applications design, Development, integration, Installation, maintenance, implementation and testing of various client/server, N-tier and web applications.   Good experience using HTML 4.0/5.0, CSS, CSS3, JavaScript, JQuery, React JS, Angular JS, Ajax and JSON. Experienced on CSS Background, CSS Margins, CSS Text, CSS Borders, CSS Alignments, CSS Padding, CSS Tables, and CSS Behaviors.   Strong Experience in dealing with CSS Animations, Backgrounds, Layouts, Positioning, Text, Border, Padding, CSS Box Model and CSS3 Media queries.   Used the concepts of Pseudo classes, layouts, positioning, text, border, transforms and padding in the various projects   Experience working with CSS pre-compilers like LESS and SASS.

   Experience working with Responsive Web design. Creating the responsive Web Pages and designing crossing browser compatibility for mainstream browsers and portable devices (mobile, tablet, laptop) by Bootstrap.   Excellent skills in building Single Page Application (SPA) using Angular JS   Experience working with JavaScript MVC frameworks AngularJS. also, Checkout product based on Backbone, MVC and Mobile modular design.   Good Experience in to build User Interactive Web pages by using web technologies React/Redux, redux-saga.   Familiar in SOAP and RESTful Web Services.   Good Web Application debugging skills using Chrome Developers Tool and Firebug.   Worked on web applications that required cross browser compatibilities like Chrome, Safari, Firefox, Internet Explorer, and Opera.   Good Experience working in Agile and Waterfall (SDLC Methodologies) environments.   Involved in daily SCRUM meetings to keep track of the ongoing project status and issues.   Strong experienced in debugging and troubleshooting the existing code.   Experience in Version Control tools including GIT and SVN.   Having Strong written and oral communication skills.   Capable performing in a fast paced, result driven atmosphere & self-motivated team player with excellent interpersonal and communicational skills. Authorized to work in the US for any employer Work Experience Front End Developer Deloitte - Nashville, TN February 2018 to Present Responsibilities: Working on Deloitte internal

communication web application.   Interacting with business system analysts to understand the requirements to ensure that right set of UI modules been built by the acceptance criteria. Developed single page application using Angular 2, Typescript, HTML5, CSS3, and Bootstrap. Built the Responsive Web pages using Bootstrap and Media queries. That could serve the different kind of devices like mobile, tablets and desktops etc.   CSS reusable purpose used the LESS as pre-processors which extends the properties of CSS.   Developed CSS3 to style page layouts, navigation, and load-spinner.   Using Npm front- end package manager to install and handle all the packages.   Created Typescript reusable components and services to consume REST API's using Component based architecture provided by Angular2.   Collaborating with the front- end design team and back end team and started converting the static files with the dynamic content with the data retrieve from the API's.   Worked with the webpack as a build tool to build the application. Used the Jasmine unit test framework to test the angular Js components and Karma used as a test runner.   Co-ordinated with the QA team for testing the latest release of the application and bug fixing.   Git or Source Tree is used as version control.   I involved in daily scrum calls with the team for the updates. We are having Every three-weeks sprint planning. Participating the sprint retrospectives.   For the bug tracking we're used the VSTS and JIRA.   Maintained the code base by frequent updates to the code repositories using VSTS.   Environment: HTML5, CSS3, TypeScript, Angular 2, JSON, Bootstrap, LESS, Npm, VS Code, Visual Studio 2017, Git, VSTS, Salesforce, Jasmine, Karma, Webpack, ES6, Agile Methodology UI Developer VISA Inc - Bellevue, WA August 2017 to February 2018 Responsibilities: I worked on the Authorize.net, Merchant Interface Refresh Web portal.   Involving in requirement gathering, designing, development, UI reviews, and maintenance.   Create Minimum Viable product in close collaborating with the CYBS UI team   Developed the User Interactive Web pages in professional manner by using web technologies like HTML5, CSS3, and Javascript, JSON, React/Redux, redux-saga as per the company standards.   Extensively used SASS as pre-processors which extends the properties of CSS.   Worked on React JS Virtual Dom and React views rendering using components which contains additional components called custom HTML tags.   Created and Used Reducers That

received said actions to modify the Store State.   Maintaining the State in the store and dispatch an action using Redux   Developed the Re-Usable React Components. Like Text Fields, Buttons etc.   Created React Components, using Redux for unidirectional Data flow.   Working with ES6 Features. For the build of JSX, and Webpack.   I was worked on Responsive web design and developed the Responsive Webpages That could be Served to Desktop, Tablets as well as mobile users.   Used the Middleware, Redux-saga, Redux-promise in application to retrieve the data from the external API's and perform the RESTful Services.   Used the Npm and Yarn package managers.   Handle and Resolve the Cross-Browser compatibility issues In Mozella, IE 9, 10, 11, safari, Firefox, and Chrome   Used Rally for bug tracking and issue tracking.   Git or Source Tree is used as version control for push the code to the repo.   I involved in daily scrum meetings with the team for the updates. We are having Every two-week sprint planning.   Extensively used TFS and AccuRev for peer code reviews and check ins.   Maintained the code base by frequent updates to the code repositories using TFS and Bit bucket.   Environment: HTML5, CSS3, JavaScript, React JS, Redux, Redux-Saga, JSON, Bootstrap, SASS, Npm, Yarn, VS Code, Git, TFS, Bit Bucket, Webpack, ES6, Agile Methodology Front end Developer Office Depot - Tampa, FL September 2016 to June 2017 Responsibilities: Worked on complete Agile Scrum methodology and User Interface web development in accordance with requirement.   Designed and developed web pages using HTML, XHTML, CSS, and jQuery, Angularjs.   Worked with business system analysts & Backend team to understand the requirements to ensure that right set of UI modules been built.   Maintaining the dynamic and secure websites and web-based applications, including widgets, and templates.   Built the Responsive Web pages using Bootstrap and Media queries to support various kinds of devices.

  Designed the front- end applications, user interactive (UI) web pages using web technologies like HTML5 and CSS3.   Worked on CSS Background, CSS Positioning, CSS Text, CSS Border, Pseudo classes, Pseudo elements etc.   Made enhancements to existing CSS and DIV tags, made upgrades using Twitter Bootstrap model.   Used advanced level of jQuery, AJAX, AngularJS, Bootstrap, and CSS layouts.   Implemented Presentation layer using CSS Framework, AngularJS, Wire-framing, HTML5.   Developed various customized views and templates using Handlebars,

JavaScript, HTML. Developed data formatted web applications and deploy the script using client-side scripting using Angularjs. Developed Single Page Application (SPA) using Angular JS Framework. Developed Web Application to replace the existing and legacy Website using Angular JS Framework. Angular JS created Custom directives for data manipulations. Created Angular JS controllers, factories, filters, Routers, and services. Designed various routing mechanisms and Implemented $http functionality in AngularJS in order to retrieve data from web servers. Used Jasmine to test Angular.js controller by built test cases. Using Npm and bower front- end package manager to install and handle all the packages. Built Web pages that are more user-interactive using jQuery Drag and Drop, Auto Complete, JSON, Angular JS, JavaScript, Bootstrap. Developed user interface using Node JS and developed client-side interface using React JS. Implemented functionalities on native iOS and android. Built an app it is like POC, and operated in Android and iOS systems at same time via using javascript and React, and Redux flux design pattern. Made UI elements behave natively by communicating between native elements and React Native. Involved in Enhancement of existing application utilizing React JS, created HTML navigation menu that is role-based menu items changes dynamically, derived from the database in the form of XML Experience with Jasmine and Karma Unit test. Used special syntax called JSX to mix HTML with Java Script with the help of React JS. Structured the JavaScript code using AngularJS. Used JIRA for bug tracking and issue tracking. Involved in writing Java API for Amazon Lambda to manage some of the AWS services. Resolved cross browser compatibilities Issues for different versions of IE, Safari, Chrome, Firefox, and Opera. Involved in Agile work flow. Every two weeks Sprint and Daily standup meetings to discuss the development of application to deliver in time. Used GIT version control for project development Maintained the code base by frequent updates to the code repository using TFS. Environment: XHTML, HTML5, CSS3, JavaScript, jQuery, AngularJS, JSON, AJAX, Bootstrap, Eclipse, Agile Methodology UI Developer Southwest Airlines - Dallas, TX July 2015 to August 2016 Responsibilities: Designed and developed web pages by using HTML, CSS and JQuery, AngularJS. Developing the code for Enhancement CR using Angular JS, HTML5, CSS and Twitter Bootstrap Used advanced level of

jQuery, AJAX, JavaScript, CSS, and CSS layouts.   Developed Single Page Application (SPA) using Angular JS Framework.   Web application development for backend system using Angular JS and Node.js with Cutting edge HTML5 and CSS3 techniques.   Designing templates based on the requirements using CSS, JavaScript, and SASS.   Deep understanding of JavaScript and the jQuery.   Developed Web Application to replace the existing and legacy Website using Angular JS Framework.   Implemented Model View Controller (MVC) Design Pattern using Angular JS.   Used Node.js as the package manager for development workflow dependent plugins.   Used Angular JS controllers to update entity models and Tasks database   Created custom directives for data manipulations and to display data in company standard format.   Understanding of the differences and bugs in various browsers and browser versions.   Strong communication, analytical and interpersonal skills working within cross-functional teams.   Debug the application using Firebug to traverse the documents and manipulated the Nodes using DOM and DOM Functions using Firefox and IE Developer Tool bar for IE.   RESTful web services interface to Java-based runtime engine and accounts.   Implemented and designed user interface for web based customer application Tested the application using the Karma.   Ran the Standalone front- end application in Grunt Server task runner.   Integrated with backend code for highly interactive AJAX based applications. Developed data formatted web applications and deploy the script using client-side scripting using JavaScript.   Worked on Cross-Browser compatibility and fixed the bugs for several browsers. Created cross-browser compatible and standards-compliant CSS-based page layouts.   Involved in daily SCRUM meetings to keep track of the project status.   Used GIT version control for the Development. Environment: HTML5, CSS3, JavaScript, jQuery, Angular JS, AJAX, JSON, Sublime. Web Developer Experian - Los Angeles, CA January 2015 to June 2015 Responsibilities: Good experience in worked with business system analyst to understand the requirements to ensure that right set of UI modules been built.   Wrote application level code to perform client-side validation using jQuery and JavaScript.   Designed the front- end applications, user interactive (UI) web pages using web technologies like HTML and CSS.   Responsible for validation of Client interface JSP pages using Struts form validations.   Used Spring Dependency Injection properties to provide

loose-coupling between layers. Implemented the Web Service client for the login authentication, credit reports and applicant information using Apache Axis 2 Web Service. Used Web services (SOAP) for transmission of large blocks of JSON data over HTTP. Implemented data-binding and MVC using AngularJS for front- end development of a current web application. Wrote jQuery function while implementing various UI screens across the whole web application (both consumer facing as well as internal application). Implemented dynamic page elements and form error validations using AngularJS directives. Involved in writing application level code to interact with APIs, Web Services using AJAX, JSON. Designed and developed web applications using JavaScript and CSS. Interacted with java controllers jQuery, AJAX, and JSON to write/read data from back end systems. Creating cross-browser compatible and standards-compliant CSS-based page layouts. Used SVN version control. Worked on cross browser compatibility issues and fix the bugs pertaining to various browsers. Environment: HTML, CSS, JavaScript, jQuery, Angular JS, AJAX, JSON Front End Developer ABV Infotech Pvt, Ltd - Bengaluru, Karnataka September 2013 to December 2014 Responsibilities: Used HTML, CSS, and JavaScript for the front- end designing. Cleaned up and rewrote front end HTML and CSS to meet validation requirements. In addition to code development, maintained project documentation and assisted in application design. Used JavaScript, CSS, and HTML to create front- end screens of the module. Used JavaScript and jQuery for validating the input given to the user interface. Developed web presentation layer using HTML and CSS according to internal standards and guidelines. Interacting with the project leader, team leader, designing and developing web pages, Animations, still graphics, banners, greeting cards, logos etc. Worked closely with Program Engineers how the front end and back end mechanism works in order to develop an interface. Involved in documenting the details related to Changes occurring in the system, following the Quality processes. Environment: HTML, CSS, JavaScript, AJAX, jQuery. Education Master's Skills CSS (4 years), HTML (4 years), JAVASCRIPT (4 years), AJAX (3 years), jQuery (3 years) Additional Information TECHNICAL SKILLS: Web Technologies: HTML 4.0/5, XHTML, CSS2/CSS3, JavaScript, CSS 3, AJAX, XML, JSON. Framework: Bootstrap, Angular.js 1x and 2, Node.js, Redux, Redux-Saga Libraries React JS, React

Native, jQuery IDE & Tools: IntelliJ IDEA, Dreamweaver, Eclipse2.x/3.x, Notepad++, Sublime text, VS code, Visual studio 2017. web Server: Apache Tomcat 5.5/6.0, IIS Data base SQL, PL/SQL Version Control: SVN, Git Operating Systems: Windows, UNIX, Mac
