Java Microservices Developer Java Microservices Developer Java Microservices Developer - Copart Dallas, TX 3 years of experience working in Dallas. TX as backend java developer. Mentored junior developers. Work in agile fashion Sponsorship required to work in the US Work Experience Java Microservices Developer Copart - Dallas, TX March 2016 to Present 1. Responsible for managing backend vertical for core components like registration and process management. 2. Built an email sender service that sends out ~6 million emails a year. Promotional emails, Transactional emails, Database poller emails. 3. Built a stored-procedure-as-a-service microservice that is generic: will take sproc name and parameters and spit out output or error from the database 4. Built an instant quote business application. It internally uses a rule engine to evaluate all the business rules and make real time decisions. Business can control the business logic without bothering the developer with this application. 5. Built an address verification service that uses USPS api s and other external verification provider apis and also intelligently verifies addresses from cache 6. Refined several applications process workflows to use rabbitmq and solr instead of couchbase. 7. Headed transition project between two systems (SAP disintegration and building destination agnostic integration flow with business processes.) Systems Analyst Saturn Infotech - Richardson, TX August 2015 to November 2015 Worked on ETL tool(Apache Sqoop) to move data from Active Oracle Database to Hadoop clusters for querying and analysis. Assisted senior developers in setting up hadoop virtual machines to support business applications for data analysis. Education MS in Computer Science in Computer Science University of Texas at Dallas - Dallas, TX August 2013 to August 2015 Skills Java, Spring, Hibernate, MySQL Links https://stackoverflow.com/story/prasana-ramesh https://twitter.com/rpv1991 https://github.com/prramesh Certifications/Licenses Oracle Certified Associate June 2012 to Present
