SQL Server Database Administrator SQL Server Database Administrator SQL Server Database Administrator Springfield, VA * 6+ years of experience in Database Administration for very large and complex databases in SQL Server 2016, 2014, 2012, 2008 R2, 2008 and 2005. * Experienced in configuration and managing Always-On Availability Groups (AAG). * Expertise in database administration on production servers with server configuration, performance tuning and maintenance with outstanding troubleshooting capabilities. * Strong technical background along with the ability to perform business analysis, write effective documentation and specifications. * Experience in T-SQL and writing stored procedures. * Administering SQL server high availability and disaster recovery strategies. * Implemented data transformation services using SSIS to different platforms. * Implemented the new SQL Server 2012 mechanisms like data compression, online indexing, Contained Databases, security principals and AAG. * Worked extensively on clustering and server consolidation. Troubleshooting production issues and raising high availability. * Proficiency and expertise in SQL server replication, backup/recovery, disaster recovery including log shipping and Database Mirroring. * Worked on configuring SQL server with minimum privileged access. * Troubleshoot performance problems, fine-tuning of databases and index Analysis. * Worked on SQL Server 2014 migration from SQL Server 2012/ 2008 / 2005. * Maintained individual service accounts for SQL Server services on cluster with different Security groups to raise security mark. * Configured and managed Windows Failover Clustering (WFS). * Experience in supporting Very Large databases (VLDB) and troubleshooting. * Strong experience in mentoring team members and on the job training. * 24 X 7 Production Database on Call Support. Work Experience SQL Server Database Administrator Daon Trusted Identity Services - Alexandria, VA 2017 to December 2017 * Installed configured, and managed SQL Servers 2012, 2014. And upgraded from SQL 2012 to 2016. * Setup database maintenance plans to backup/restore, reorganize indexes, and update index statistics on production databases. * Used system monitor, SQL Server Profiler and in-house queries to troubleshoot CPU/memory bottlenecks that negatively impact performance. * Used Execution Plans to fine tune Stored Procedure performance. * Implemented table partitioning for a large table to optimizing query execution. * Configure and managed Always On for SQL Server

2012. * Configured and maintained snapshot, peer-to-peer replication and troubleshoot replication issues. * Implemented the TDE (Transparent Data Encryption) in all the Production servers to secure the customer information. * Check drive space and maintenance plan\view history. * Periodically run in-house query to monitor the status of Indexes. * Check SQL error logs for any unexpected issues. * Created insert and update trigger to monitor changes for the audit purposes. * Deployed SSIS packages to provide greater automation of the importing, exporting and manipulation of data. * Prepared technical documentation for all database process and procedures.

SQL Server Database Administrator Advanced Patient Advocacy - Richmond, VA June 2015 to November 2017 * Installed, configured, and managed SQL server 2014/ 2012 and migrated databases from SQL server 2008R2/2005. * Performing daily DBA tasks like maintenance plans, scheduling jobs on daily/weekly basis and Monitoring Event Viewer and SQL Error log for errors. * Configured and maintained windows failover cluster with SQL server 2012 R2.Configured and administered always on availability group. * Configured and managed Transactional Replication. * Configured SQL Server Backup/Recovery, disaster recovery and planning. * Managed and worked on security, permission of SQL server and data encryption. * Managed index usage and fragmentation and updated statistics in databases. * Involved in troubleshooting, database performance tuning, concurrency and root cause analysis. * Worked on query optimization and tuning using SQL server profiler, database engine tuning advisor, and activity monitor and analyzing execution plan. * Checked database health by using DBCC commands and DMVS. * Created SSIS package and jobs to run on schedule time. * Create table partitioning to improve the performance of large databases. * Supported end users through Remedy ticketing system. * Applied SQL server software patching and day to day management. * Involved in capacity planning and monitoring data/log files size, growth and disks space. SQL Server Database Administrator Research Triangle Institute - Research Triangle Park, NC May 2013 to June 2015 * Installation and administration of SQL server 2012R2/2008/2008R2. * Implemented procedure documents in place to ensure smooth day to day administration of databases. * User management and database security imposition by creation and granting of roles and privileges. * Create logins and granting privileges as per

requirement. * Implement DBA maintenance tasks for increase the database performance with the help of re-indexing, re-organize index, and update statistics. * SQL server jobs scheduling, creating alerts, operators and troubleshoot the Job failures. * Addressing user requests which comes in the form of e-mails (tickets). * Configured and managed mirroring as a high availability solution. * Implemented log-shipping as disaster recovery solution. * Implementation of backup strategy. * Creating and maintaining database maintenance plans. * Checking of logs, windows system monitor alerts. * Developed, implemented, configured and maintained operational procedures and programs including disaster recovery and system security. * Created view, schemas and basic stored procedure. * Provide 24*7 on call support as per the scheduled routines. Education Bachelor of Arts University of Gloucestershire Skills Database administration, Database, Ms sql server, Ms sql server 2005, Sql server, Sql server 2005, Sql, Exchange, Remedy, Scom, T-sql, Jira, Java, Windows 8, Microsoft exchange Additional Information SKILLS: Databases MS SQL Server 2016, 2014, 2012, 2008, MS SQL Server 2005 Programming T-SQL, JAVA DBA Database administration of MS SQL Server 2016, 2014, 2012, 2008, 2005 Operating System Windows 2012/ 2008/2003 Advanced Server, Windows7, Windows 8.1, windows10 Other Software SCCM, SCOM, Microsoft Exchange Tools Backup Utility, SQL-sentry, Redgate, Remedy, JIRA
