Front- end developer Front-end developer Front- end developer - BigDropInc My working experience is more then 2 years with such languages as HTML, CSS and JavaScript. In common I develop projects alone from null and make functional by technical specification. Im using npm package manager for the JavaScript plugins but sometimes write my own if need. In team work I implement web components in project and supplement the current functional technical specification. Work Experience Front- end developer BigDropInc June 2016 to Present Project/Role description: Development of websites and single page applications. Implement react-components in websites.
