Sr. UI Developer Sr. UI Developer Sr. UI Developer - United Health Group Eden Prairie, MN ? Over 6 years of professional experience in all phases of software development life cycle including requirements Analysis and Debugging, Applications Design, Development, Integration, Maintenance, Installation, Testing of various client/server, N-tier and web applications. ? Experience in Client Scripting language and server side scripting languages like HTML5, CSS3, JavaScript with ECMA6 features, TypeScript, jQuery, JSON, Bootstrap, Angular1.x/2/4/5, React, Redux, Backbone.js, Express, Node.js. ? Developed user interface by using the ReactJS, Flux for SPA development. ? Experience with Gulp/Grunt task runner and combined with Node, Bower package manager to install JavaScript latest version of libraries. ? Experience in developing Graphic User Interface (GUI) to display report data using D3.js with Cross-browser compatibility and Web application scaling. ? Experienced in collaborating with Design team/UX team/ business stack-holder to understand and translate the requirement into web applications. ? Extensive experience on implementing the AJAX with rich features like deferred, promises, pipe, and callback functions. ? Experience in creating user interface widgets using jQuery, Bootstrap and AngularJS. ? Rich experience with development using AngularJS extensive features for loading views in a Single Page Application, MVC structure for JavaScript files, data-binding using Angular JS directives and also building custom directives. ? Experience with Gulp/Grunt task runner and combined with Node, Bower package manager to install JavaScript latest version of libraries. ? Experience in the developing applications for different platforms like web browser, iOS, Android, and Chrome OS. ? Strong expertise in the iterative Agile and Scrum development methodologies for software development. ? Extensive experience using JSF, Servlets, JSP, JDBC, JMS, JSTL and JNDI. ? Experience with Jasmine and Karma for Unit Testing. ? Experience using JIRA for defect tracking. ? Excellent communication skills to discuss the projects with technical and non-technical SME's and also during the sprint meetings for Agile as well as Scrum development methodology. ? Great ability to write clearly, maintainable, well-documented, well-commented and efficient code for web development. ? Experience in using revision control systems CVS, Git and Jazz. ? Working experience on tools like Sonar and Jenkins. ? Experience working with a wide range of applications

in all phases. ? Known for ability to multi-task and work on different applications at the same time. ? Proven track record demonstrating innovative and unique designing skills, computer proficiency, ability to work in a stressful environment with projects and interaction with every team member. ? Some of the attributes that would describe me would be Team player, Quick learner, Hard- worker, Self-Motivated and Strong interest in Front End Development. Authorized to work in the US for any employer Work Experience Sr. UI Developer United Health Group - Eden Prairie, MN September 2018 to Present Responsibilities: ? Developed user interface by using the ReactJS, Flux for SPA development. ? Involved in SDLC Requirements gathering, Analysis, Design, Development and testing of application using AGILE methodology (SCRUM) and TDD Development. ? Involved in designing and developing the web pages using HTML 5, CSS3, JavaScript, Bootstrap, SASS, LESS, React.js, Redux, Flex , Node JS, Mongo DB, ? Responsible to Style, look and feel of the web page with SASS that extends CSS with dynamic behavior such as variable, mixing, operations and functions. ? Setup production dependencies for application are Redux JS, Webpack, Grunt, Babel, Polyfill. ? Used React concepts like JSX (JavaScript Syntax Extension), components, state and props. ? Worked upon the dashboard for the project which contained a variety of charts and draggable components using D3, React JS. ? Implemented stable React components and stand-alone functions to be added to any future pages. ? Responsible for React UI and architecture. Building components library, including Tree, Slide-View, and Table Grid using Reactstrap. ? Created and used Reducers that received said Actions to modify the Store State Tree. ? Used Bootstrap and media queries to create a responsive website that fit all users and devices from desktop to tablet and mobile phones. ? Designed and implemented the Mobile Application on android platform. ? Used Redux middleware to handle asynchronous events/ Side effects and maintain functional paradigm. ? Used WebPack, Babel and gulp for transpilation(compilation) configuration for Typescript to be converted to JavaScript. ? Worked with backend engineers to optimize existing API calls to create efficiencies by deprecating unneeded API calls. ? Utilized React for its efficient data flow architecture to create a lightweight and render efficient web app that searched projects via the GitHub API through keywords. ? Used Express.js

on the top of Node.js as a proxy to interact with RESTful services and interaction with MongoDB which is a NoSQL Database. ? Used GitHub repository to submit code changes that are in turn reviewed by the dev leads before they are merged to the Head Master branch before production.

Environment: ReactJS, Redux, NodeJS, MongoDB, ExpressJS, HTML, CSS, JavaScript, Jquery, TypeScript, React-Router, Bootstrap, Restful Web, AJAX, JSON, NPM, ES6, WebPack, GitHub, JIRA, Jenkins, AGILE, Visual Studio Code. Sr. UI Developer FirstData - Atlanta, GA January 2017 to August 2018 Responsibilities: ? Involved in designing, developing and testing the web application by using the HTML5, CSS3, Bootstrap,and Angular 4/6. ? Involved in designing the CSS templates for use in all pages on the website working with CSS Background,positioning,text,border,margin,padding,andtable. ? Applied optimization techniques to reduce page size and load times to enhance user experience usingsprites. ? Experience in writing Components, Pipes and Services to separate concern and handle different situations by using Angular2/4. ? Used Angular 4 to implement complex forms and performed the validations using Form Builder. ? Used AngularJS as framework to create a Single Page Application (SPA) which can bind data to specific views and synchronize data with server using Sass, LESS, Bootstrap, AngularJS. ? Migrating some of the applications from AngularJS 1 to Angular 2 and componentize the code as per the Angular recommendations for better testability. ? Experienced in developing web applications using latest JavaScript ES6 features. ? Design and implement innovative strategies for maximizing storage space using HTML5, CSS3, JavaScript and Angular 2/4/5. ? Created TypeScript reusable components and services to consume REST API's using Component based architecture provided by Angular 4. ? Developed Single Page Applications using Angular4 ng-route module. ? Implemented .ng-if with new else statement and used separate animation package using Angular 4. ? Created and used Reducers that received said Actions to modify the Store State Tree. ? Maintained states in the stores and dispatched the actions using redux. ? Used Node JS to run Web pack tasks and build properly the project. ? Implemented modules into Node JS to integrate with designs and requirements ? Involved in using excel builder 3rd Party open source library and tweak it to make sure it will work with IE11. ? Component for UX-Library

consisted of Button, Checkbox, Input, Icons, Toggle Button, Dropdown, Multi-Level Dropdown and many more.   ? In Phase Two, worked closely with the Back- End team to display data using the Custom Components, library Components, and Redux. ? Working with ECMA Script 6 features. For build of JSX and ES2015(ES6) used Babel, webpack. ? Used Middleware, Redux-Promise in application to retrieve data from Back- End and to also perform RESTFUL services. ? Added dynamic Functionality by creating and dispatching Action Creators that deployed Actions. ? Optimized animation logic with optimistic functions to increase performance in rendering. ? Worked with backend engineers to optimize existing API calls to create efficiencies by deprecating unneeded API calls. ? Involved in Restful web services to call for POST, PUT, DELETE and GET methods. ? Created social login using gigya. Integrated the social accounts with the express account. ? Used Object Oriented Programming concepts to develop UI components that could be reused across the Web Application. ? Used Git for version controlling and regularly pushed the code to GitHub. ? Used HP Quality Center as the bug tracking system to track and maintain the history of bugs/issues on everyday basis. ? Worked with JASMINE unit test framework to write unit tests for JavaScript code. ? Extensively used debugging tools such as Firebug and IE Dev tools to investigate the issues and fix the bugs. ? Wrote code to handle cross browser compatibility issues in IE 7, 8, 9, FF, Safari and Chrome ? Knowledge on Node.js environment set-up and interacted Node Service team to get the Service. ? Interacted with Testing Team, Scrum Masters and Business Analysts for fixing of Issues ? Interacted with Customers and development teams for Fix the Issues. ? Performed the System Testing, Regression Testing for Complete UI after fixing the Issues which are reported by Testing Team.   Environment: HTML 5, CSS3, Sass, Less, JavaScript, Angular 2/4/5/6, Bootstrap, Ajax, My SQL, XML, XSL, XSLT, JSON, Git hub, Restful API, AWS, Mongo DB, HP Quality Center, Jasmine and Web Strom Sr. UI Angular JS Developer Wheels Inc - Chicago, IL May 2016 to December 2016 Responsibilities: ? Created Short URLs Using Ionic framework and SASS. ? Brief experience on implementing the Angular 2.0 in creating animations based on ionic classes. ? Responsible for creating the screens with table-less designs meeting W3C standard. ? Responsible for design and development of the web pages from mock- ups. ?

Used jQuery plugins to insert calendar in Short URL Page. ? Designed dynamic and multi-browser compatible pages using HTML, CSS, jQuery. ? Used NodeJS application in Express JS framework to create URL shortening service. ? Used SASS for styling URL'S. ? Created Node.JS backend for creating RESTful Web Services using the Express Framework. ? Developed Functional Requirement Document based on users' requirement. ? Extensively used Angular, JavaScript, jQuery UI and jQuery to provide UI functionality. ? Built Web pages that are more user-interactive using AJAX, Typescript, LESS, Bootstrap and Angular JS. ? Involved in making the application Responsive using Bootstrap and used LESS pre-processor. ? Handling cross browser compatibility issues (IE, Firefox, and Safari) on both Windows and Mac. Also, used fall back codes. ? Done testing for cross browser functionalities to confirm the application consistency across various browsers. ? Involved in developing various generic JavaScript functions used for validations. ? Used VideoJS framework for HTML5 video player. ? Built responsive admin portal using BootStrap. ? Updated and maintained the internal code base (tested code before deploying to live site) using GitHub. ? Involved in Requirement gathering phase to gather the requirements from the client program manager and dealing with UX team to continuously accommodate changing user requirements ? Involved in complete User Interface designing and coded the web site in XHTML, CSS and Java Script. ? Extensively used Angular 2.0 & Typescript, ionic framework and jQuery to provide UI functionality. ? Used Cassandra NoSQL ? Database for storing the transactions on all the services for asynchronous writes and fetches. Environment: HTML/HTML5, CSS/CSS3, JavaScript, Angular.js1.x, Angular.js 2.0, Node.js, Bootstrap, Jasmine, Karma, Underscore, JSHint, NPM, SASS, Gulp, Rally, Agile methodology, SVN, Jenkins, TypeScript. Front End/UI Developer Verizon - Dallas, TX November 2014 to April 2016 Responsibilities: ? Involved in various phases of Software Development Life Cycle (SDLC) as requirement gathering, data modeling, analysis, architecture design& development for the project ? Proficient in building Web User Interface (UI) using HTML, CSS, JavaScript, DOM, JQuery and AJAX that follows W3C Web standards and are browser compatible. ? Used HTML5 elements like video, audio and canvas in making the website interactive. ? Designed dynamic and browser compatible pages using HTML, CSS, Reactjs and

JavaScript(ES6/5). ? Developed GUI using JavaScript, HTML, DOM, XHTML, CSS in ongoing projects ? Designed Pdf, Excel and Print previews for all the reports in the application using HTML, JavaScript and SQL Stored Procedure. ? Developed React JS pages, Web services calls and AJAX calls for the application ? Used React JS in development of the web application to bind the data/model that is being retrieved from a database through services provided in a controller to the view using scope. ? Used React JS in components like JSX, creating React components, Virtual ? DOM, React Props, Lifecycle methods, working with React States and Events. ? Created custom component to use with different module using React Flex, JavaScript(Es6/5), Material Design. ? Worked on Mongodb database design and indexing techniques. Good knowledge on MongoDB write concern majority. ? Implemented read preferences in MongoDB replica set. Configured hidden members in replicaset. ? Installed and configured MongoDB for an enterprise application to analyze the big data requirements ? Configured replication and high availability for MongoDB instances ? Worked on MongoDB database concepts such as locking, transactions, indexes, Sharding, replication, schema design, etc. ? Involved in writing application level code to interact with APIs, Web Services using AJAX and React resources. ? Created React components, using Redux for unidirectional data flow ? Integrated with backend through service layer using AJAX to fetch page data ? Experience with popular React.js workflows (such as Redux). ? Worked on developing separate react and redux components so it can be reused. ? Build stable React components and stand-alone functions to be added to any future pages. ? Used React-Router to turn application into Single Page Application ? Worked in using React JS components, Forms, Events, Keys, Router, Animations and Flex concept. ? Worked on responsive design and developed a single ISOMORPHIC responsive website that could be served to desktop, Tablets and mobile users using React.js. ? Maintained states in the stores and dispatched the actions using redux. ? Implemented the Drag and Drop functionality using React-Draggable ? Used React-Autocomplete for creating google maps location search on the webpage Added Excel-Builder to download the Tabular data in Excel format using react. ? Worked on Github to maintain the repository. ? Worked with agile technology. ? Managed projects with Grunt task runner. ? Handled response data from RESTFUL

web services using XML, JSON and JQuery to update UI Interacted with java controllers (JQuery, Ajax, and JSON to write/read data from back end systems). ? Created GET/PUT request and response using RESTFUL web services. ? Complex data modelisation and DB lock management (MongoDB). ? Have used testing frameworks like jest and enzyme. ? Responsible for developing and maintaining web application, using Node JS ? Created and configured new JIRA projects and worked with departments to maintain existing JIRA projects.   Environment: HTML5, CSS3, Bootstrap, React.js, AJAX, Responsive Web Design, Node.js, JQuery UI, JSON, Atom, JavaScript, Jest, Enzyme, Webpack, Grunt, Agile methodology, Mongo DB, GIT, JIRA, Eclipse and Windows.

Web UI Developer EDATA Solutions - Hyderabad, Telangana April 2012 to June 2014 Responsibilities: ? Analyzed business requirements, participated in technical design, development and testing of various modules assigned. ? Used the functionalities to write code in HTML5/HTML, CSS3/CSS, JavaScript, JQuery, Ajax, JSON, and Bootstrap with MongoDB database as the backend. ? Used HTML and CSS in the development in front end of the application. ? Developed GUI using JavaScript, HTML, DOM, XHTML, CSS in ongoing projects ? Responsible to manipulate HTML5, CSS3 in JQuery as well as making the pages dynamic using AJAX, JSON and XML. ? Extensively worked on ES5 new features such as Arrow functions, Classes, Iterators and Generators. ? Developed application pages using HTML, CSS, Bootstrap, JavaScript and jQuery. ? Involved in developing a new business application to the layout using Grid orientation model Bootstrap framework. ? Developed JQuery code using an XML Http Request Adapter to send an AJAX request to the server side code and also implemented a callback function to handle the results. ? Worked on prototypes for Responsive Web design. ? Implemented JavaScript source code and embedded nested handling logic using JQuery event handlers and call back functions. ? Developed the JQuery callback functions for implementing asynchronous communication using AJAX. ? Extensively used JQuery UI for screen design and development. ? Styling pages using CSS3.0 and developed JavaScript for user interfaces. ? Used CSS Blueprint to create grids and adopt cross browser interactive features and to make the web pages more interactive. ? Implemented XML parsing code for different application. ? Created Storyboard & Sprints in Jira,

configured Confluence for Project management ? Monitor and support daily activities of multiple scrum teams to keep process aligned with Agile manifesto. Conduct iteration planning, daily scrums and retrospective. ? Setup Continuous Integration environment using Jira, Git and ant python ? Contracted to serve as the JIRA Systems Administrator fortheinternational JIRA/Confluence infrastructure, including all associated programs, plugins and systems ? Worked with javascript testing frameworks like jasmine. ? Frequently met with the project manager to review project goals and to create proposals for future developments, researching their fields for UI design. ? Worked with the team of architects, back- end Developers and Sr Front- end Developers to gather requirements and enhance the application functionality and add new features.   Environment: HTML5, CSS3 ,JQuery, Bootstrap, Responsive Web Design, AJAX, JQuery, JavaScript, Rest Web Services, Jasmine,Gulp, npm, JIRA,Git, JSON, XML, Eclipse and Windows. Education Master's
