Authorized to work in the US for any employer Work Experience Front End Developer KeyBank - Cleveland, OH December 2014 to Present Project:Digital 17   Digital 17is a project to come up with totally new design toupdate customersbanking and financial services based on the old system. We named each release after famous bridge in US, such as for Brooklyn Release which happened in June 2015, from customer impact perspective, a very small pilot group of users internal to the bank most part of digital LOB got internal user name to test application which was done as far as that time, there was no impact to external customers. After Brooklyn release, there would be multiple releases where will continue to roll out to more customers and add new functionality into IBX service

which replace old backend service IB2, by the end of July in 2016, the whole project will be released and we plan to have all customers on IBX.   Responsibilities: Analyzed all the task requirements and user stories which created by Business Analysis team from a developer skill point at the start of each sprint.Maintain, enhance and recommend solutions that best suit business and technology needs form UI standpoint.   Started html development once we got wireframes from UI/UX designer, coding withHTML5, CSS3, SASS using Sublime Text2 editor.   During the period of html template development, we were really picky about html tag select which have to be sematic html tag, as it is going be playing an important role in ADA-compliant feature in our application.   Designed and developed web and mobile applications with responsive feature using bootstrap 3.3.6.   We also integrated all latest bootstrap feature into our style guide and customize it, so we can grab and apply it to our application directly once it is needed which is really convenient and more efficient.   Implemented MVC pattern of AngularJS frameworkwhich usedto developed Single Page Application(SPA), the entire functionality of project are developed by AngularJS, included client side validation and data retrievingfrom backend server using $Http service.   Managed scripting packages with Bower installation and Gulpfor task runner such as linting, compilation, unit testing, minification.   Used version control toolsmart SVN.   Conducted cross-browser testing in all browsers:IE8+, Firefox, Chrome, Safari. Used tools included IE tester, Firebugs, Web Developer and Chrome DevTools..   Environment: HTML, CSS, Javascript, jQuery, BootstrapFirebug, IE Teste, Sublime Text, Git Sourcetree. Front End Developer JP MORGAN CHASE - Columbus, OH January 2013 to November 2014 Project:Chase 3.0   Chase 3.0is a project to provide customers banking and financial services.
