Senior Front End Developer Senior Front End Developer North Brunswick, NJ   Experienced in programming and development of computer, web-based, and mobile applications with a focus in object oriented coding.   Completed augmented reality application that provided access to collection of items via an animated guide.   Created an Android application that employed internet functionality to enable access by multiple clients while maintaining synchronized data on the server.

 Motivated by challenging projects and a well focused team. One aspect of being a developer that I love is leaving work at the end of the day knowing that I'm smarter than I was at the beginning of the day because of the learning I've done for a project. Authorized to work in the US for any employer Work Experience Senior Front End Developer Verizon Wireless - Basking Ridge, NJ October 2015 to Present   Developed complex dynamically generated pages within tight deadlines.   Worked with outside vendors to implement and improve how our company uses their products to increase sales.

 Improved upon the development standard of my team and documented them to improve the team s process.   Worked with our marketing team to expand our options for how to advertise to our customers.   Developed new ways of using our personalization tools to dynamically market to unique audiences.   Lead multiple initiatives (include new templating techniques and building dynamic content to reduce maintenance) to allow new functionality across our site.   Developed a process by which we can use device data from our backend catalog to create personalized advertising.   Received multiple awards for my performance on high priority projects for the business.   Lead multiple site projects by coordinating with other teams and developers to ensure the deadline was met. Education B.A. in Interactive Multimedia The College of New Jersey - Ewing, NJ December 2014
