Web Development Educator Web Development Educator Web Development Educator - Thinkful Campbell, CA I'm an experienced developer and IT administrator. I have solid experience as a full-stack web developer, and I love the challenge involved in creating and managing practical working applications. I work extremely well with others in a team environment. My technical languages / skills include: Ruby, Ruby on Rails, Node.js, React, Angular, Git/Github, HTML, CSS, SASS, JQuery, JavaScript, MySQL, PHP, with moderate experience developing for .NET core and working in C#. I have moderate experience creating Alexa skills and developing Lambda functions. I've launched and maintained applications on platforms like Heroku, Google Cloud, Microsoft Azure, and AWS. I'm a huge proponent of Test Driven Development, especially in it's utility in creating efficient collaboration and contribution to open source projects. I'm skillful at working LAMP configurations and Unix environments. I'm experienced with CMS software, particularly Wordpress, and have worked with clients in a front-facing role to design as well as develop. I have experience using common project management tools like Trello and Basecamp. I like to lift other folks up -- to be a support when the team needs it, but also to lead from the front when called to by circumstances as   well. I take great pride in my work ethic, and joy in creating things. Work Experience Web Development Educator Thinkful October 2018 to Present Remote I work as an educator / grader for Bloc / Thinkful. I spend time reviewing assignments and providing constructive feedback to students, in addition to gentle coaching and encouragement. I take pride in being a great resource for students who are learning our trade.
